

Table of Contents

Evolutionary Robotics: A Survey of Applications and Problems <i>Jean-Arcady Meyer, Phil Husbands and Inman Harvey</i>	1
How Co-Evolution can Enhance the Adaptive Power of Artificial Evolution: Implications for Evolutionary Robotics <i>Stefano Nolfi and Dario Floreano</i>	22
Running Across the Reality Gap: Octopod Locomotion Evolved in a Minimal Simulation <i>Nick Jakobi</i>	39
Detour Behaviour in Evolving Robots: Are Internal Representations Necessary? <i>Orazio Miglino, Daniele Denaro, Guido Tascini and Domenico Parisi</i>	59
Evolving Robot Behaviours with Diffusing Gas Networks <i>Phil Husbands</i>	71
Explaining the Evolved: Homunculi, Modules, and Internal Representation <i>Michael Wheeler</i>	87
Some Problems (and a Few Solutions) for Open-Ended Evolutionary Robotics <i>Nick Jakobi and Matthew Quinn</i>	108
Noise and the Pursuit of Complexity: A Study in Evolutionary Robotics <i>Anil K. Seth</i>	123
Hardware Solutions for Evolutionary Robotics <i>Dario Floreano and Francesco Mondada</i>	137
Blurred Vision: Simulation-Reality Transfer of a Visually Guided Robot <i>Tom M.C. Smith</i>	152

Learning to Move a Robot with Random Morphology <i>Peter Dittrich, Andreas Bürgel and Wolfgang Banzhaf</i>	165
Learning Behaviors for Environmental Modeling by Genetic Algorithm <i>Seiji Yamada</i>	179
Evolving and Breeding Robots <i>Henrik H. Lund and Orazio Miglino</i>	192
Off-Line Model-Free and On-Line Model-Based Evolution for Tracking Navigation Using Evolvable Hardware <i>Didier Keymeulen, Masaya Iwata, Kenji Konaka, Ryouhei Suzuki, Yasuo Kuniyoshi and Tetsuya Higuchi</i>	211
Incremental Evolution of Neural Controllers for Robust Obstacle-Avoidance in Khepera <i>Joël Chavas, Christophe Corne, Peter Horvai, Jérôme Kodjabachian and Jean-Arcady Meyer</i>	227
