Contents

 Inequalities Between Means (with Two and Three Variables)	l	Basic (Elementary) Inequalities and Their Application
 Geometric (Triangle) Inequalities	2	Inequalities Between Means (with Two and Three Variables)
 Bernoulli's Inequality, the Cauchy–Schwarz Inequality, Chebishev's Inequality, Surányi's Inequality Inequalities Between Means (General Case) 5.1 Points of Incidence in Applications of the AM–GM Inequality 6 The Rearrangement Inequality 7 Convexity, Jensen's Inequality 8 Trigonometric Substitutions and Their Application for Proving Algebraic Inequalities 8.1 The Most Usual Forms of Trigonometric Substitutions 8.2 Characteristic Examples Using Trigonometric Substitutions 9 Hölder's Inequality, Minkowski's Inequality and Their Variants 10 Generalizations of the Cauchy–Schwarz Inequality, Chebishev's Inequality and the Mean Inequalities 11 Newton's Inequality, Maclaurin's Inequality 12 Schur's Inequality, Muirhead's Inequality and Karamata's Inequality 13 Two Theorems from Differential Calculus, and Their Applications for Proving Inequalities 14 One Method of Proving Symmetric Inequalities with Three Variables 	3	Geometric (Triangle) Inequalities
 5 Inequalities Between Means (General Case)	1	Bernoulli's Inequality, the Cauchy–Schwarz Inequality, Chebishev's Inequality, Surányi's Inequality
 6 The Rearrangement Inequality 7 Convexity, Jensen's Inequality 8 Trigonometric Substitutions and Their Application for Proving Algebraic Inequalities 8.1 The Most Usual Forms of Trigonometric Substitutions 8.2 Characteristic Examples Using Trigonometric Substitutions 9 Hölder's Inequality, Minkowski's Inequality and Their Variants 9 Hölder's Inequality, Minkowski's Inequality and Their Variants 10 Generalizations of the Cauchy–Schwarz Inequality, Chebishev's Inequality and the Mean Inequalities 11 Newton's Inequality, Muirhead's Inequality 12 Schur's Inequality, Muirhead's Inequality and Karamata's Inequality 13 Two Theorems from Differential Calculus, and Their Applications for Proving Inequalities 14 One Method of Proving Symmetric Inequalities with Three Variables 	5	Inequalities Between Means (General Case) 49 5.1 Points of Incidence in Applications of the AM-GM Inequality 53
 7 Convexity, Jensen's Inequality	5	The Rearrangement Inequality
 8 Trigonometric Substitutions and Their Application for Proving Algebraic Inequalities	7	Convexity, Jensen's Inequality
 9 Hölder's Inequality, Minkowski's Inequality and Their Variants 10 Generalizations of the Cauchy–Schwarz Inequality, Chebishev's Inequality and the Mean Inequalities	3	Trigonometric Substitutions and Their Application for Proving Algebraic Inequalities 79 8.1 The Most Usual Forms of Trigonometric Substitutions 86 8.2 Characteristic Examples Using Trigonometric Substitutions 89
 10 Generalizations of the Cauchy–Schwarz Inequality, Chebishev's Inequality and the Mean Inequalities)	Hölder's Inequality, Minkowski's Inequality and Their Variants 95
 Newton's Inequality, Maclaurin's Inequality	10	Generalizations of the Cauchy–Schwarz Inequality, Chebishev's Inequality and the Mean Inequalities
 Schur's Inequality, Muirhead's Inequality and Karamata's Inequality Two Theorems from Differential Calculus, and Their Applications for Proving Inequalities One Method of Proving Symmetric Inequalities with Three Variables 	1	Newton's Inequality, Maclaurin's Inequality
 13 Two Theorems from Differential Calculus, and Their Applications for Proving Inequalities 14 One Method of Proving Symmetric Inequalities with Three Variables 	12	Schur's Inequality, Muirhead's Inequality and Karamata's Inequality
14 One Method of Proving Symmetric Inequalities with Three Variables	13	Two Theorems from Differential Calculus, and Their Applications 133 for Proving Inequalities 133
	14	One Method of Proving Symmetric Inequalities with Three Variables

15	Method for Proving Symmetric Inequalities with Three Variables Defined on the Set of Real Numbers
16	Abstract Concreteness Method (ABC Method) 155 16.1 ABC Theorem 155
17	Sum of Squares (SOS Method)
18	Strong Mixing Variables Method (SMV Theorem)
19	Method of Lagrange Multipliers
20	Problems
21	Solutions
