Abstract	v
List of Abbreviations	ix
List of Symbols	xiii
1 Introduction	1
2 Packet-Switched Mobile Communication	5
2.1 General Transmission System Model	5
2.2 Channel Coding Concepts	7
2.2.1 Turbo Codes	8
2.2.2 Low Density Parity Check Codes	13
2.2.3 Convergence Analysis Using EXIT Charts	17
3 Rate Matching by Rate-Compatible Convolutional Codes	25
3.1 Rate-Compatible Punctured Convolutional Codes	26
3.2 Rate-Compatible Repetition Convolutional Codes	27
3.3 Rate-Compatible Insertion Convolutional Codes	29
3.4 Adaptive Modulation and Coding in LTE	34
4 EXIT Functions of Rate-Compatible Codes	37
4.1 Rate-Compatible Punctured Convolutional Codes	39
4.1.1 Random Puncturing	40
4.1.2 Optimization by EXIT Charts	44
4.1.3 Deterministic Puncturing	47
4.2 Rate-Compatible Repetition Convolutional Codes	50
4.2.1 Random Repetition	50
4.2.2 Optimization by EXIT Charts	59
4.2.3 Deterministic Repetition	62
4.3 Rate-Compatible Insertion Convolutional Codes	64
4.3.1 Random Insertion	65
4.3.2 Optimization by EXIT Charts	70
	vii

4.3.3	Deterministic Insertion	72
4.4	EXIT Chart Comparison of RCIC and RCRC Turbo Codes	73
4.5	Generalization of EXIT Chart Analysis to BSC and LDPC Codes .	74
4.5.1	Binary Symmetric Channel	75
4.5.2	Low-Density Parity-Check Codes	78
5	Rate Matching by Dummy Bit Insertion	83
5.1	LTE	83
5.2	WIMAX	88
6	Hybrid ARQ in Mobile Communication Systems	95
6.1	Novel HARQ for LTE Based on RCIC Codes	97
6.2	HARQ With Unreliable Feedback	106
7	Header Bit Assisted Channel Decoding	117
7.1	Network Architecture Aspects	119
7.2	Soft Decision Header Decoding	121
7.3	Performance Bound on HACD	122
8	Summary	129
A	Channel Models	133
A.1	Binary Erasure Channel	133
A.2	Binary Symmetric Channel	135
A.3	Additive White Gaussian Noise Channel	135
A.4	3GPP Typical Urban Channel Model	137
B	Mathematical Derivations	139
C	Complexity of the LogMAP Algorithm	147
D	Internet Protocol Suite	151
D.1	Internet Protocol	151
D.2	User Datagram Protocol	155
D.3	Real-Time Transport Protocol	156
	Bibliography	159
