Foreword	V
Authors	VI
1. Combustion	1
1.1 Stoichiometry	2
1.1.1 Reaction elements of technical fuels	2
1.1.2 Characteristic values for the composition of gaseous fuels	3
1.1.2.1 Characteristic amount of atoms for gaseous fuels	3
1.1.3 Combustion calculation	5
1.1.3.1 Calculation of the air requirement	6
1.1.3.2 Calculation of the exhaust gas amount and exhaust gas composition	8
1.2 Energy flux in the furnace	11
1.2.1 Characteristic furnace interfaces	11
1.2.2 Characteristic energies and heat flux	12
1.2.3 Energy balance	14
1.2.4 Efficiency factors	14
1.2.4.1 Combustion efficiency	15
1.2.4.2 Furnace efficiency	17
1.2.4.3 Heating efficiency	17
1.2.5 Saving of fuel with preheating of the air	18
2. Fluid dynamics	21
2.1 The ideal gas	22
2.2 Equation of continuity	24
2.3 Equation of Bernoulli	25
2.4 Turbulent free jet	28
2.5 Pressure losses in pipings	29
3. Heat transfer	31
3.1 Mechanisms of heat transfer	32
3.2 Heat radiation	34
3.2.1 Electromagnetic spectrum	34
3.2.2 Stefan-Boltzmann's law	35
3.2.3 Planck's distribution law	35
3.2.4 Reflection, absorption, transmission	36

3.2.5	Kirchhoff's law.....	37
3.2.6	Radiation from a diffuse surface and direction-dependent radiation	38
3.2.7	Radiation transfer.....	38
3.2.7.1	Radiation flux	38
3.2.7.2	Radiation transfer between two bodies.....	38
3.2.8	Gaseous radiation.....	43
3.3	Heat conduction	43
3.3.1	Differential equations of the temperature field.....	43
3.3.2	Steady state, one-dimensional heat conduction	44
3.3.2.1	Plane walls with given surface temperatures	44
3.3.2.2	Plane walls with convective heat transfer	45
3.3.3	Unsteady state heat conduction without heat sources	45
3.3.3.1	Bodies with high values of thermal conductivity	45
3.4	Convection.....	47
3.4.1	Application of the dimensional analysis for heat transfer	48
3.4.2	Cylinders in a flow parallel and perpendicular to their longitudinal axis.....	49
4.	Burner technology.....	51
4.1	Combustion techniques.....	52
4.1.1	Wood fire.....	53
4.1.2	Open grate fire	53
4.1.3	Simple furnace.....	53
4.1.4	Firing with burners	54
4.1.5	Flame formation	54
4.1.6	Flame velocity	56
4.1.7	Subdivision of flames.....	57
4.2	Classification of burners and flames.....	58
4.2.1	Air supply	58
4.2.2	Fuel and fuel preparation	58
4.2.3	Way of stabilization	58
4.2.4	Flame color	59
4.2.5	Air or fuel staging	59
4.2.6	Flame shapes.....	60
4.2.7	Flow velocity	60
4.2.8	Direct and indirect heating.....	61
4.2.9	Air preheating.....	61
4.2.10	Stoichiometry.....	62
4.2.11	Turndown	63
4.3	Flameless oxidation	63
4.3.1	Principle	64

4.3.2	Computations and experimental results	67
4.3.3	Field measurements.....	69
4.3.4	Applications	72
4.3.5	Essential features.....	73
5.	Computer simulation	75
5.1	Assembly of input data	76
5.1.1	Computational mesh.....	76
5.1.2	Stationary and non-stationary calculations	78
5.1.3	Material properties.....	78
5.1.4	Boundary conditions.....	79
5.1.5	Computing models	80
5.2	Solution of equations	82
5.3	Presentation of the results	83
6.	Reduction of pollutants.....	85
6.1	NO _x reduction by flame cooling.....	88
6.2	Lean premixed combustion	89
6.3	Flame staging.....	89
6.4	Recirculation of combustion products.....	90
6.5	Oxygen combustion.....	91
6.6	Limits of air-preheating	91
6.7	Reduction of fuel NO _x	91
6.8	NO _x removal.....	92
6.9	NO _x units.....	92
6.10	NO _x measurements.....	94
7.	Heat exchangers	95
7.1	Basic design	97
7.2	Characteristics	100
7.3	Determination of the efficiency	103
7.3.1	Determination of the idle value	104
7.3.2	Measurement of the air preheating temperature	107
7.3.3	Measurement of the flue gas temperature.....	108
8.	Industrial burners	111
8.1	Cold air burners	112
8.1.1	Premix burners.....	112

8.1.2	Nozzle mix burners	112
8.1.3	Fan burners.....	117
8.1.4	Surface burners	118
8.1.5	Porous burners	118
8.1.6	Flat flame burners	119
8.1.7	Burners for low calorific and special fuel gases	120
8.1.8	Multi-fuel burners	120
8.1.9	Burners for oxygen-enriched air	124
8.2	Hot air burners	125
8.2.1	Proportionally controlled hot air burners with central recuperator	128
8.2.2	Pulse-fired hot air burners with central recuperator	129
8.2.3	Hot air burners with central regenerator	134
8.2.4	Steady controlled hot air burner with zone recuperator or regenerator	134
8.3	Recuperative burners.....	135
8.3.1	Recuperative burners with eductor.....	138
8.3.2	Recuperative burner with flue gas valve	141
8.4	Regenerative burners.....	141
8.4.1	Regenerative burners pair.....	142
8.4.2	Regenerative burner.....	145
8.5	Radiant tubes.....	146
8.5.1	Types of radiant tubes.....	146
8.5.2	Heat recovery with radiant tubes	150
8.5.3	Temperature uniformity	153
8.5.4	Control of radiant tubes	153
8.5.5	Arrangement of radiant tubes	155
9.	Standardization of industrial burners and industrial thermoprocessing equipment.....	159
9.1	Introduction and principle	160
9.2	Standards, organizations and application field of standards.....	160
9.3	Standards and their domain	162
9.4	Fundamentals about European standardization work	162
9.4.1	New approach.....	163
9.4.2	Connection between directives and standardization.....	164
9.4.3	Application of European harmonized standards.....	164
9.5	Machinery directive (MD)	164
9.5.1	EU declaration of conformity for machinery	166
9.5.2	Procedure for partly completed machine	167
9.5.3	CE-marking	169
9.5.4	Standardization structure for the machinery directive	170
9.6	Presumption of conformity.....	170

9.7	Additional EU-directives	170
9.7.1	Pressure equipment directive (PED)	170
9.7.2	Gas appliance directive (GAD)	171
9.8	Operation of plant and accident prevention regulations.....	171
9.9	Important standards for industrial burners, thermoprocessing equipment and their components	172
9.9.1	Important type A standards for thermoprocessing equipment and industrial burners	172
9.9.1.1	EN ISO 12100	172
9.9.2	Important type B standards for thermoprocessing equipment and industrial burners	173
9.9.2.1	EN ISO 13850	173
9.9.2.2	EN ISO 13732-1	173
9.9.2.3	EN 953	173
9.9.2.4	EN 60204-1	174
9.9.2.5	EN 61496-1	175
9.9.3	Important type C standards for industrial burner.....	175
9.9.3.1	EN 746-1	175
9.9.3.2	EN 746-2	176
9.9.4	Standards for components of industrial burners	176
9.9.4.1	EN 161	176
9.9.4.2	EN 225-1	177
9.9.4.3	EN 225-2	177
9.9.4.4	EN 230	177
9.9.4.5	EN ISO 23553-1	178
9.9.4.6	EN 298	178
9.9.4.7	EN 1643	179
9.9.4.8	EN 1854	179
9.9.4.9	EN 12067-1	179
9.9.4.10	EN 12067-2	180
9.9.5	Standard for package burner.....	180
9.9.5.1	EN 267	180
9.9.5.2	EN 676	181
9.9.6	Standards for thermoprocessing equipment	181
9.9.6.1	EN 746-3	182
9.9.6.2	EN 746-4	182
9.9.6.3	EN 746-5	183
9.9.6.4	EN 746-6	184
9.9.6.5	prEN 746-7	184
9.9.6.6	EN 746-8	185
9.9.6.7	EN 1547	186
9.9.6.8	EN 1539	187

9.9.7	ISO-standards for industrial burner and industrial thermoprocessing equipment	187
9.9.7.1	ISO 13577-1	188
9.9.7.2	ISO 13577-2	189
9.9.7.3	ISO 13577-3	189
9.9.7.4	ISO 13577-4	190
9.9.7.5	ISO 13574	190
9.9.8	How to read a standard	191
Appendix		193
Heat processing keywords		194
Further technical information		197
Some technical magazines		197
Research institutes and associations		197
Trade fairs		199
Some relevant books in English		199
“heat processing” publications from 2008 until now		200
Symbols		201
Unit conversion		202
Important material data		202
Some data for quick estimate		203
Conversion of length units		204
Conversion formulas of temperature units		204
Index		205
Advertisers’ Index		209
