|   |                                                                                                                                                              |     |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1 | Structures and Properties of<br>Orthodontic Materials<br><i>William A. Brantley</i> . . . . .                                                                | 1   |
| 2 | Mechanics and Mechanical Testing<br>of Orthodontic Materials<br><i>William A. Brantley</i><br><i>Theodore Eliades</i><br><i>Alan S. Litsky</i> . . . . .     | 27  |
| 3 | Instrumental Techniques<br>for Study of Orthodontic Materials<br><i>George Eliades</i><br><i>William A. Brantley</i> . . . . .                               | 49  |
| 4 | Orthodontic Wires<br><i>William A. Brantley</i> . . . . .                                                                                                    | 77  |
| 5 | Enamel Etching and Bond Strength<br><i>John M. Powers</i><br><i>Marion L. Messersmith</i> . . . . .                                                          | 105 |
| 6 | Oral Microbiological Changes,<br>Long-Term Enamel Alterations Due<br>to Decalcification, and Caries<br>Prophylactic Aspects<br><i>Bjørn Øgaard</i> . . . . . | 123 |
| 7 | Orthodontic Brackets<br><i>Theodore Eliades</i><br><i>George Eliades</i><br><i>William A. Brantley</i> . . . . .                                             | 143 |
| 8 | Elastomeric Ligatures and Chains<br><i>Theodore Eliades</i><br><i>George Eliades</i><br><i>David C. Watts</i><br><i>William A. Brantley</i> . . . . .        | 173 |

|    |                                                                                                                                              |     |
|----|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 9  | Orthodontic Adhesive Resins and Composites: Principles of Adhesion<br><i>David C. Watts</i> . . . . .                                        | 189 |
| 10 | Orthodontic Adhesive Resins<br><i>Theodore Eliades</i><br><i>George Eliades</i> . . . . .                                                    | 201 |
| 11 | Cements in Orthodontics<br><i>Aphrodite Kakaboura</i><br><i>George Vougiouklakis</i> . . . . .                                               | 221 |
| 12 | Impression Materials<br><i>William M. Johnston</i> . . . . .                                                                                 | 241 |
| 13 | Bonding to Non-Conventional Surfaces<br><i>Efstratios Papazoglou</i> . . . . .                                                               | 253 |
| 14 | Principles of Biocompatibility<br><i>John C. Wataha</i> . . . . .                                                                            | 271 |
| 15 | Allergic Reactions and Safety Concerns<br><i>Arne Hensten-Pettersen</i><br><i>Nils Jacobsen</i><br><i>Margrét Rósa Grímsdóttir</i> . . . . . | 287 |
|    | Appendix . . . . .                                                                                                                           | 300 |
|    | Figure and Table Credits . . . . .                                                                                                           | 302 |
|    | Index . . . . .                                                                                                                              | 305 |
