Part I Introduction and Preliminary Material

1	Introduction	3
1.1	Content and Organization of the Book	6
1.2	When X is a Brownian Motion	9
1.2.1	The Normalized Functionals $V^m(f, X)$	9
1.2.2	The Non-normalized Functionals $V^n(f, X)$	12
1.3	When X is a Brownian Motion Plus Drift	14
1.3.1	The Normalized Functionals $V^m(f, X)$	14
1.3.2	The Non-normalized Functionals $V^n(f, X)$	15
1.4	When X is a Brownian Motion Plus Drift Plus a Compound Poisson Process	16
1.4.1	The Law of Large Numbers	16
1.4.2	The Central Limit Theorem	18
2	Some Prerequisites	23
2.1	Semimartingales	23
2.1.1	First Decompositions and the Basic Properties of a Semimartingale	24
2.1.2	Second Decomposition and Characteristics of a Semimartingale	29
2.1.3	A Fundamental Example: Lévy Processes	33
2.1.4	Itô Semimartingales	35
2.1.5	Some Estimates for Itô Semimartingales	39
2.1.6	Estimates for Bigger Filtrations	44
2.1.7	The Lenglart Domination Property	45
2.2	Limit Theorems	45
2.2.1	Stable Convergence in Law	46
2.2.2	Convergence for Processes	48
2.2.3	Criteria for Convergence of Processes	50
2.2.4	Triangular Arrays: Asymptotic Negligibility	53

2.2.5	Convergence in Law of Triangular Arrays	56
	Bibliographical Notes	59

Part II The Basic Results

3	Laws of Large Numbers: The Basic Results	63
3.1	Discretization Schemes	63
3.2	Semimartingales with p -Summable Jumps	66
3.3	Law of Large Numbers Without Normalization	69
3.3.1	The Results	69
3.3.2	The Proofs	73
3.4	Law of Large Numbers with Normalization	79
3.4.1	Preliminary Comments	79
3.4.2	The Results	80
3.4.3	The Proofs	83
3.5	Applications	91
3.5.1	Estimation of the Volatility	92
3.5.2	Detection of Jumps	93
	Bibliographical Notes	96
4	Central Limit Theorems: Technical Tools	97
4.1	Processes with $\mathcal{F}$ -Conditionally Independent Increments	97
4.1.1	The Continuous Case	98
4.1.2	The Discontinuous Case	100
4.1.3	The Mixed Case	104
4.2	Stable Convergence Result in the Continuous Case	105
4.3	A Stable Convergence Result in the Discontinuous Case	108
4.4	An Application to Itô Semimartingales	114
4.4.1	The Localization Procedure	114
4.4.2	A Stable Convergence for Itô Semimartingales	121
5	Central Limit Theorems: The Basic Results	125
5.1	The Central Limit Theorem for Functionals Without Normalization	125
5.1.1	The Central Limit Theorem, Without Normalization	126
5.1.2	Proof of the Central Limit Theorem, Without Normalization	129
5.2	The Central Limit Theorem for Normalized Functionals:	
	Centering with Conditional Expectations	133
5.2.1	Statement of the Results	134
5.2.2	The Proof	137
5.3	The Central Limit Theorem for the Processes $\overline{V}^n(f, X)$	144
5.3.1	Assumptions and Results	145
5.3.2	Localization and Elimination of Jumps	149
5.3.3	Proof of the Central Limit Theorem for $V^n(f, X)$	151
5.4	The Central Limit Theorem for Quadratic Variation	160
5.5	A Joint Central Limit Theorem	173
5.6	Applications	176
5.6.1	Estimation of the Volatility	176

5.6.2	Detection of Jumps	179
5.6.3	Euler Schemes for Stochastic Differential Equations	179
	Bibliographical Notes	185
6	Integrated Discretization Error	187
6.1	Statements of the Results	188
6.2	Preliminaries	192
6.2.1	An Application of Itô's Formula	193
6.2.2	Reduction of the Problem	196
6.3	Proof of the Theorems	201
6.3.1	Proof of Theorem 6.1.2	202
6.3.2	Proof of Theorem 6.1.3	208
6.3.3	Proof of Theorem 6.1.4	208
6.3.4	Proof of Theorem 6.1.8	210
 Part III More Laws of Large Numbers		
7	First Extension: Random Weights	215
7.1	Introduction	215
7.2	The Laws of Large Numbers for $V^n(F, X)$	217
7.3	The Laws of Large Numbers for $V^n(F, X)$	219
7.4	Application to Some Parametric Statistical Problems	222
8	Second Extension: Functions of Several Increments	227
8.1	Introduction	227
8.2	The Law of Large Numbers for $V^n(F, X)$ and $\mathcal{V}^n(F, X)$	230
8.3	The Law of Large Numbers for $V^n(\Phi, k_n, X)$	234
8.4	The LLN for $V^n(F, X)$, $\mathcal{V}^n(F, X)$ and $V^n(\Phi, k_n, X)$	238
8.4.1	The Results	238
8.4.2	The Proofs	239
8.5	Applications to Volatility	244
9	Third Extension: Truncated Functionals	247
9.1	Approximation for Jumps	248
9.2	Approximation for the Continuous Part of X	250
9.3	Local Approximation for the Continuous Part of X : Part I	254
9.4	From Local Approximation to Global Approximation	261
9.5	Local Approximation for the Continuous Part of X : Part II	264
9.6	Applications to Volatility	269
 Part IV Extensions of the Central Limit Theorems		
10	The Central Limit Theorem for Random Weights	273
10.1	Functionals of Non-normalized Increments—Part I	273
10.2	Functionals of Non-normalized Increments—Part II	278
10.3	Functionals of Normalized Increments	283
10.4	Application to Parametric Estimation	290
	Bibliographical Notes	296

11	The Central Limit Theorem for Functions of a Finite Number of Increments	297
11.1	Functionals of Non-normalized Increments	297
11.1.1	The Results	298
11.1.2	An Auxiliary Stable Convergence	301
11.1.3	Proof of Theorem 11.1.2	304
11.2	Functionals of Normalized Increments	310
11.2.1	The Results	310
11.2.2	Elimination of Jumps	314
11.2.3	Preliminaries for the Continuous Case	315
11.2.4	The Processes Y^n and $\mathcal{Y}^n$	317
11.2.5	Proof of Lemma 11.2.7	322
11.3	Joint Central Limit Theorems	325
11.4	Applications	329
11.4.1	Multipower Variations and Volatility	329
11.4.2	Sums of Powers of Jumps	330
11.4.3	Detection of Jumps	332
	Bibliographical Notes	337
12	The Central Limit Theorem for Functions of an Increasing Number of Increments	339
12.1	Functionals of Non-normalized Increments	340
12.1.1	The Results	340
12.1.2	An Auxiliary Stable Convergence Result	344
12.1.3	Proof of Theorem 12.1.2	352
12.2	Functionals of Normalized Increments	355
12.2.1	The Results	356
12.2.2	Preliminaries for the Proof	358
12.2.3	Proof of Lemma 12.2.4	360
12.2.4	Block Splitting	364
12.2.5	Proof of Lemma 12.2.3	367
13	The Central Limit Theorem for Truncated Functionals	371
13.1	A Central Limit Theorem for Approximating the Jumps	371
13.2	Central Limit Theorem for Approximating the Continuous Part	377
13.2.1	The Results	378
13.2.2	Proofs	384
13.3	Central Limit Theorem for the Local Approximation of the Continuous Part of X	388
13.3.1	Statements of Results	389
13.3.2	Elimination of the Jumps and of the Truncation	396
13.3.3	The Scheme of the Proof in the Continuous Case	400
13.3.4	Proof of Lemma 13.3.12	401
13.3.5	Proof of Lemma 13.3.13	404
13.3.6	Proof of Theorem 13.3.8	409
13.4	Another Central Limit Theorem Using Approximations of the Spot Volatility	410

13.4.1	Statements of Results	411
13.4.2	Proofs	414
13.5	Application to Volatility	422
	Bibliographical Notes	426

Part V Various Extensions

14	Irregular Discretization Schemes	429
14.1	Restricted Discretization Schemes	430
14.2	Law of Large Numbers for Normalized Functionals	437
14.3	Central Limit Theorem for Normalized Functionals	444
14.3.1	The Results	444
14.3.2	Preliminaries	447
14.3.3	The Scheme of the Proof when X is Continuous	450
14.3.4	Proof of Lemma 14.3.4	451
14.3.5	Proof of Lemma 14.3.5	453
14.4	Application to Volatility	458
	Bibliographical Notes	460
15	Higher Order Limit Theorems	461
15.1	Examples of Degenerate Situations	462
15.2	Functionals of Non-normalized Increments	464
15.3	Applications	474
	Bibliographical Notes	477
16	Semimartingales Contaminated by Noise	479
16.1	Structure of the Noise and the Pre-averaging Scheme	480
16.1.1	Structure of the Noise	480
16.1.2	The Pre-averaging Scheme	482
16.2	Law of Large Numbers for General (Noisy) Semimartingales	485
16.3	Central Limit Theorem for Functionals of Non-normalized Increments	488
16.3.1	The Results	489
16.3.2	A Local Stable Convergence Result	492
16.3.3	A Global Stable Convergence Result	503
16.3.4	Proof of Theorem 16.3.1	510
16.4	Laws of Large Numbers for Normalized Functionals and Truncated Functionals	512
16.4.1	Statement of Results	512
16.4.2	The Proofs	514
16.5	Laws of Large Numbers and Central Limit Theorems for Integral Power Functionals	521
16.5.1	The Laws of Large Numbers	521
16.5.2	Central Limit Theorems: The Results	530
16.5.3	Some Estimates	535
16.5.4	Proof of Theorem 16.5.7	546
16.6	The Quadratic Variation	554
	Bibliographical Notes	563

Appendix 565

 A.1 Estimates for Itô Semimartingales 565

 A.2 Convergence of Processes 572

 A.3 Triangular Arrays 577

 A.4 Processes of Finite Variation 579

 A.5 Some Results on Lévy Processes 581

Assumptions on the Process X 583

References 585

Index of Functionals 589

Index 593
