

Table of Contents

Invited Talks

The Twilight Zone: From Testing to Formal Specifications and Back Again (Abstract)	1
<i>Koen Claessen</i>	
Types and Recursion Schemes for Higher-Order Program Verification (Abstract)	2
<i>Naoki Kobayashi</i>	
The Sketching Approach to Program Synthesis	4
<i>Armando Solar-Lezama</i>	

Program Analysis

Large Spurious Cycle in Global Static Analyses and Its Algorithmic Mitigation	14
<i>Hakjoo Oh</i>	
Abstract Transformers for Thread Correlation Analysis	30
<i>Michal Segalov, Tal Lev-Ami, Roman Manevich, Ramalingam Ganesan, and Mooly Sagiv</i>	
Scalable Context-Sensitive Points-to Analysis Using Multi-dimensional Bloom Filters	47
<i>Rupesh Nasre, Kaushik Rajan, R. Govindarajan, and Uday P. Khedker</i>	

Transformation and Optimization

A Short Cut to Optimal Sequences	63
<i>Akimasa Morihata</i>	
A Skeletal Parallel Framework with Fusion Optimizer for GPGPU Programming	79
<i>Shigeyuki Sato and Hideya Iwasaki</i>	
Witnessing Purity, Constancy and Mutability	95
<i>Ben Lippmeier</i>	

Type System

On the Decidability of Subtyping with Bounded Existential Types	111
<i>Stefan Wehr and Peter Thiemann</i>	
Fractional Ownerships for Safe Memory Deallocation	128
<i>Kohei Suenaga and Naoki Kobayashi</i>	

Ownership Downgrading for Ownership Types	144
<i>Yi Lu, John Potter, and Jingling Xue</i>	

Separation Logic

A Fresh Look at Separation Algebras and Share Accounting	161
<i>Robert Dockins, Aquinas Hobor, and Andrew W. Appel</i>	
Weak Updates and Separation Logic	178
<i>Gang Tan, Zhong Shao, Xinyu Feng, and Hongxu Cai</i>	
Proving Copyless Message Passing	194
<i>Jules Villard, Étienne Lozes, and Cristiano Calcagno</i>	

Logic and Foundation Theory

On Stratified Regions	210
<i>Roberto M. Amadio</i>	
Parallel Reduction in Resource Lambda-Calculus	226
<i>Michele Pagani and Paolo Tranquilli</i>	
Classical Natural Deduction for S4 Modal Logic	243
<i>Daisuke Kimura and Yoshihiko Kakutani</i>	

Software Security and Verification

Bi-abductive Resource Invariant Synthesis	259
<i>Cristiano Calcagno, Dino Distefano, and Viktor Vafeiadis</i>	
Certify Once, Trust Anywhere: Modular Certification of Bytecode Programs for Certified Virtual Machine	275
<i>Yuan Dong, Kai Ren, Shengyuan Wang, and Suqin Zhang</i>	
Asymptotic Resource Usage Bounds	294
<i>Elvira Albert, Diego Alonso, Puri Arenas, Samir Genaim, and German Puebla</i>	
The Higher-Order, Call-by-Value Applied Pi-Calculus	311
<i>Nobuyuki Sato and Eihiro Sumii</i>	
Branching Bisimilarity between Finite-State Systems and BPA or Normed BPP Is Polynomial-Time Decidable	327
<i>Hongfei Fu</i>	
Refining Abstract Interpretation-Based Static Analyses with Hints	343
<i>Vincent Laviron and Francesco Logozzo</i>	
Author Index	359
