

# Contents

<b>1 Adaptive Networks .....</b>	<b>1</b>
Thilo Gross and Hiroki Sayama	
1.1 Introduction .....	1
1.2 The Interplay Between State and Topology .....	2
1.3 Timescale Separation and Critical Phenomena .....	3
1.4 Self-Organization of Non-trivial Network Topologies .....	4
1.5 Adaptive Networks with Inseparable Timescales .....	5
1.6 In this Book .....	6
References .....	8

## Part I Real-World Examples of Adaptive Networks

<b>2 Social Group Dynamics in Networks .....</b>	<b>11</b>
Gergely Palla, Péter Pollner, Albert-László Barabási, and Tamás Vicsek	
2.1 Introduction .....	11
2.2 Construction of the Networks .....	13
2.3 Finding Communities .....	15
2.3.1 The Clique Percolation Method .....	15
2.3.2 Preferential Attachment at the Level of Communities .....	16
2.3.3 The Static Communities .....	20
2.3.4 Validating the Communities .....	22
2.4 Evolving Communities .....	24
2.5 Statistical Properties of the Community Dynamics .....	27
2.5.1 Basic Statistics .....	27
2.5.2 Stationarity and Lifetime .....	29
2.5.3 Predicting Community Break Up .....	30
2.5.4 Merging of Communities .....	32
2.6 Conclusion .....	34
References .....	35

<b>3 Time-Dependent Complex Networks: Dynamic Centrality, Dynamic Motifs, and Cycles of Social Interactions .....</b>	39
Dan Braha and Yaneer Bar-Yam	
3.1 Dynamic Centrality in Large-Scale Communication Networks .....	39
3.2 Dynamic Centrality in Spatial Proximity Social Networks .....	44
3.3 Dynamic Network Motifs and Cycles of Social Interaction .....	46
3.4 Summary .....	48
References .....	49
<b>4 Adaptive Biological Networks .....</b>	51
Mark D. Fricker, Lynne Boddy, Toshiyuki Nakagaki, and Daniel P. Bebber	
4.1 Introduction .....	51
4.2 Network Development in Mycelial Fungi .....	52
4.3 Predicted Transport Characteristics of the Mycelial Network .....	54
4.4 Comparison Between Predicted Transport and Experimental Transport .....	58
4.5 Oscillations and Pulsatile Transport .....	58
4.6 Network Robustness .....	61
4.7 Simple Networks in the Plasmodial Slime Mould <i>Physarum</i> <i>Polycephalum</i> .....	61
4.8 Universal Features of Biological Networks? .....	65
References .....	67

## Part II Self-Organization of Adaptive Networks

<b>5 Self-Organized Criticality and Adaptation in Discrete Dynamical Networks .....</b>	73
Thimo Rohlfs and Stefan Bornholdt	
5.1 Introduction .....	73
5.2 Dynamics of Random Boolean Networks and Random Threshold Networks .....	77
5.2.1 Underlying Graph Structure .....	77
5.2.2 Random Boolean Networks .....	79
5.2.3 Random Threshold Networks .....	79
5.2.4 Basic Dynamical Properties of RBNs and RTNs .....	80
5.3 Network Self-Organization from Co-evolution of Dynamics and Topology .....	83
5.3.1 Activity-Dependent Rewiring .....	83
5.3.2 Adaptive Thresholds – Time Scale Separation Leads to Complex Topologies .....	90
5.3.3 Extension to Random Boolean Networks .....	93
5.3.4 Correlation-Based Rewiring in Neural Networks .....	96

5.4	Summary and Outlook . . . . .	101
References . . . . .		103
<b>6</b>	<b>Self-Organization and Complex Networks . . . . .</b>	<b>107</b>
	Guido Caldarelli and Diego Garlaschelli	
6.1	Introduction . . . . .	107
6.2	Scale Invariance and Self-Organization . . . . .	109
6.2.1	Geometric Fractals . . . . .	109
6.2.2	Self-Organized Criticality . . . . .	111
6.3	Complex Networks . . . . .	115
6.3.1	Network Properties . . . . .	115
6.3.2	Network Models . . . . .	116
6.4	A Self-Organized Network Model . . . . .	122
6.4.1	Motivation . . . . .	123
6.4.2	Definition . . . . .	124
6.4.3	Analytical Solution . . . . .	125
6.4.4	Particular Cases . . . . .	128
6.5	Conclusions . . . . .	132
References . . . . .		133
<b>7</b>	<b>Self-Organization of Network Structure in Coupled-Map Systems . . . . .</b>	<b>137</b>
	Junji Ito and Kunihiko Kaneko	
7.1	Introduction . . . . .	137
7.2	Adaptive Network of Logistic-Map Units . . . . .	138
7.2.1	Model Formulation . . . . .	139
7.2.2	Unit Dynamics . . . . .	140
7.2.3	Connection Dynamics . . . . .	143
7.2.4	Network Structure . . . . .	145
7.2.5	Dynamic Networks in the Desynchronized Phase . . . . .	147
7.3	Adaptive Network of Bursting Units . . . . .	153
7.3.1	Model Formulation . . . . .	153
7.3.2	Unit Dynamics . . . . .	154
7.3.3	Connection Dynamics . . . . .	155
7.3.4	Mechanism of Structure Formation . . . . .	158
7.4	Formation of Hierarchical Network Structure Triggered by External Input . . . . .	158
7.5	Summary and Discussion . . . . .	160
References . . . . .		162
<b>8</b>	<b>Dynamical Optimization and Synchronization in Adaptive Complex Networks . . . . .</b>	<b>165</b>
	Maoyin Chen and Jürgen Kurths	
8.1	Introduction . . . . .	165
8.2	Phase Synchronization in the Kuramoto Model . . . . .	167

8.3	Complete Synchronization and Enhanced Synchronizability in Adaptive Complex Networks .....	175
8.3.1	Complete Synchronization in Adaptive Complex Networks	175
8.3.2	Enhanced Synchronizability in Adaptive Complex Networks .....	180
8.4	Conclusions .....	186
	References .....	187

### **Part III Contact Processes and Epidemiology on Adaptive Networks**

<b>9</b>	<b>Contact Processes and Moment Closure on Adaptive Networks .....</b>	<b>191</b>
	Anne-Ly Do and Thilo Gross	
9.1	Introduction .....	191
9.2	Opinion Formation – Theme and Variations .....	193
9.2.1	Continuous Opinions .....	194
9.2.2	Two-Valued Choice and Irreversible Discord .....	195
9.2.3	The Influence of Bounded Tolerance .....	197
9.2.4	Asymmetric Insertion of Influence .....	199
9.2.5	Other Approaches .....	201
9.3	Epidemic Spreading and Moment Closure .....	201
9.3.1	The Adaptive SIS Model .....	202
9.3.2	Other Approaches .....	206
9.4	Summary and Outlook .....	207
	References .....	208
<b>10</b>	<b>Noise Induced Dynamics in Adaptive Networks with Applications to Epidemiology .....</b>	<b>209</b>
	Leah B. Shaw and Ira B. Schwartz	
10.1	Introduction .....	209
10.2	Model .....	212
10.3	Bifurcation Structure .....	214
10.4	Effect of Recovered Class on Fluctuations .....	216
10.5	Delayed Outbreaks .....	221
10.6	Lifetime of the Endemic Steady State .....	222
10.7	Network Geometry .....	223
10.8	Conclusions and Discussion .....	225
	References .....	226

### **Part IV Social Games on Adaptive Networks**

<b>11</b>	<b>A Dynamic Model of Social Network Formation .....</b>	<b>231</b>
	Brian Skyrms and Robin Pemantle	
11.1	Introduction .....	231

<b>11.2 Making Friends: A Baseline Model of Uniform Reinforcement . . . . .</b>	234
11.2.1 Friends I: Asymmetric Weights . . . . .	234
11.2.2 Friends II: Symmetrized Reinforcement . . . . .	235
11.2.3 Analysis of Friends I and II . . . . .	235
<b>11.3 Making Enemies . . . . .</b>	237
11.3.1 The Transfer Model . . . . .	238
11.3.2 The Resistance Model . . . . .	239
11.3.3 A Better Model? . . . . .	240
<b>11.4 Perturbations of the Models . . . . .</b>	240
11.4.1 Discounting the Past . . . . .	240
11.4.2 Analysis of Discounting the Past . . . . .	241
11.4.3 Introduction of Noise . . . . .	242
11.4.4 Noise and Discounting . . . . .	243
<b>11.5 Reinforcement by Games of Nontrivial Strategy . . . . .</b>	244
11.5.1 Rousseau's Stag Hunt . . . . .	244
11.5.2 Co-evolution of Structure and Strategy . . . . .	246
<b>11.6 Conclusion . . . . .</b>	247
<b>References . . . . .</b>	251
<b>12 Evolutionary Games in Self-Organizing Populations . . . . .</b>	253
Arne Traulsen, Francisco C. Santos, and Jorge M. Pacheco	
<b>12.1 Evolutionary Game Dynamics . . . . .</b>	253
<b>12.2 Active Linking . . . . .</b>	254
12.2.1 Linking Dynamics . . . . .	255
12.2.2 Strategy Dynamics . . . . .	256
12.2.3 Separation of Timescales . . . . .	258
12.2.4 Effects of Active Linking . . . . .	260
<b>12.3 Individual Based Linking Dynamics . . . . .</b>	261
12.3.1 Specification of the Linking Dynamics . . . . .	261
12.3.2 Numerical Results . . . . .	263
12.3.3 Graph Structures Under Individual Based Linking Dynamics . . . . .	264
<b>12.4 Discussion . . . . .</b>	265
<b>References . . . . .</b>	266
<b>13 The Diplomat's Dilemma: Maximal Power for Minimal Effort in Social Networks . . . . .</b>	269
Petter Holme and Gourab Ghoshal	
<b>13.1 Introduction . . . . .</b>	269
<b>13.2 Definition of the Model . . . . .</b>	271
13.2.1 Preliminaries . . . . .	271
13.2.2 Moves . . . . .	272
13.2.3 Strategies . . . . .	272
13.2.4 Strategy Updates and Stochastic Rewiring . . . . .	274

13.2.5	The Entire Algorithm . . . . .	274
13.3	Numerical Results . . . . .	275
13.3.1	Time Evolution . . . . .	275
13.3.2	Example Networks . . . . .	275
13.3.3	Effects of Strategies on the Network Topology . . . . .	277
13.3.4	Transition Probabilities . . . . .	282
13.3.5	Dependence on System Size and Noise . . . . .	283
13.4	Discussion . . . . .	284
	References . . . . .	287

## Part V Graph-Rewriting-Based Approaches

<b>14</b>	<b>Graph-Rewriting Automata as a Natural Extension of Cellular Automata</b> . . . . .	291
	Kohji Tomita, Haruhisa Kurokawa, and Satoshi Murata	
14.1	Introduction . . . . .	291
14.2	Formulation . . . . .	292
14.2.1	Rules of Graph-Rewriting Automata . . . . .	293
14.2.2	Update Procedure . . . . .	294
14.2.3	Simulation of Graph-Rewriting Automata . . . . .	295
14.2.4	Examples . . . . .	296
14.3	Rule Design by Hand-Coding . . . . .	297
14.3.1	Design of Self-replicating Turing Machine . . . . .	298
14.4	Rule Search by Evolutionary Computation . . . . .	300
14.4.1	Evolutionary Computation . . . . .	300
14.4.2	Simulation Results . . . . .	302
14.5	Exhaustive Trial . . . . .	303
14.5.1	Rule Representation . . . . .	304
14.5.2	Results . . . . .	304
14.6	Conclusions . . . . .	307
	References . . . . .	308
<b>15</b>	<b>Generative Network Automata: A Generalized Framework for Modeling Adaptive Network Dynamics Using Graph Rewritings</b> . . . . .	311
	Hiroki Sayama and Craig Laramée	
15.1	Introduction . . . . .	311
15.2	About Graph Rewriting . . . . .	313
15.3	Definition of GNA . . . . .	314
15.4	Generality of GNA . . . . .	317
15.5	Computational Exploration of Possible Dynamics of Simple Binary-State GNA . . . . .	317
15.5.1	Assumptions . . . . .	317
15.5.2	Methods . . . . .	320
