NINTH EDITION

Robert S. Pindyck • Daniel L. Rubinfeld

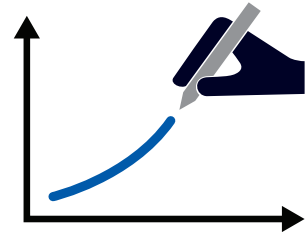

Pearson

Practice, Engage, and Assess with MyLab Economics®

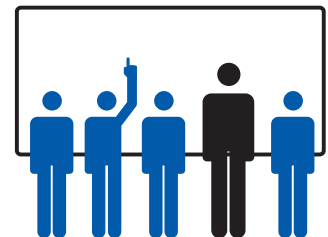

- **Pearson eText**—The Pearson eText gives students access to their textbook anytime, anywhere. In addition to note-taking, highlighting, and bookmarking, the Pearson eText offers interactive and sharing features. Instructors can share comments or highlights, and students can add their own, for a tight community of learners in any class.

- **Practice**—Algorithmically generated homework and study plan exercises with instant feedback ensure varied and productive practice, helping students improve their understanding and prepare for quizzes and tests. Draw-graph exercises encourage students to practice the language of economics.

- **Learning Resources**—Personalized learning aids such as Help Me Solve This problem walkthroughs and Figure Animations provide on-demand help when students need it most.

- **Personalized Study Plan**—Assists students in monitoring their own progress by offering them a customized study plan based on Homework, Quiz, and Test results. Includes regenerated exercises with unlimited practice, as well as the opportunity to earn mastery points by completing quizzes on recommended learning objectives.

- **Digital Interactives**—Engaging assessment activities that promote critical thinking and application of key economic principles. Each Digital Interactive has progressive levels where students can explore, apply, compare, and analyze economic principles. Many Digital Interactives include real time data from FRED® that displays, in graph and table form, up-to-the-minute data on key macro variables. Digital Interactives can be assigned and graded within MyEconLab, or used as a lecture tool to encourage engagement, classroom conversation, and group work.

- **NEW: Math Review Exercises in MyEconLab**—MyEconLab now offers an array of assignable and auto-graded exercises that cover fundamental math concepts. Geared specifically toward principles and intermediate economics students, these exercises aim to increase student confidence and success in these courses. Our new Math Review is accessible from the assignment manager and contains over 150 graphing, algebra, and calculus exercises for homework, quiz, and test use.

About the Authors

Brief Contents

Contents

Preface

Part One Introduction: Markets and Prices

1 Preliminaries

1.1 The Themes of Microeconomics

Trade-Offs

Prices and Markets

Theories and Models

Positive versus Normative Analysis

1.2 What Is a Market?

Competitive versus Noncompetitive Markets

Market Price

Market DefinitionThe Extent of a Market

1.3 Real versus Nominal Prices

1.4 Why Study Microeconomics?

Corporate Decision Making: The Toyota Prius

Public Policy Design: Fuel Efficiency Standards for the Twenty-First Century

Summary

Questions for Review

Exercises

2 The Basics of Supply and Demand

2.1 Supply and Demand

The Supply Curve

Table of Contents

The Demand Curve

2.2 The Market Mechanism

2.3 Changes in Market Equilibrium

2.4 Elasticities of Supply and Demand

Point versus Arc Elasticities

2.5 Short-Run versus Long-Run Elasticities

Demand

Supply

*2.6 Understanding and Predicting the Effects of Changing Market Conditions

2.7 Effects of Government Intervention Price Controls

Summary

Questions for Review

Exercises

Part Two Producers, Consumers, and Competitive Markets

3 Consumer Behavior

Consumer Behavior

3.1 Consumer Preferences

Market Baskets

Some Basic Assumptions about Preferences

Indifference Curves

Indifference Maps

The Shape of Indifference Curves

The Marginal Rate of Substitution

Perfect Substitutes and Perfect Complements

3.2 Budget Constraints

The Budget Line

The Effects of Changes in Income and Prices

3.3 Consumer Choice

Corner Solutions

3.4 Revealed Preference

3.5 Marginal Utility and Consumer Choice

Rationing

*3.6 Cost-of-Living Indexes

Ideal Cost-of-Living Index

Laspeyres Index

Table of Contents

Paasche Index

Price Indexes in the United States: Chain Weighting

Summary

Questions for Review

Exercises

4 Individual and Market Demand

4.1 Individual Demand

Price Changes

The Individual Demand Curve

Income Changes

Normal versus Inferior Goods

Engel Curves

Substitutes and Complements

4.2 Income and Substitution Effects

Substitution Effect

Income Effect

A Special Case: The Giffen Good

4.3 Market Demand

From Individual to Market Demand

Elasticity of Demand

Speculative Demand

4.4 Consumer Surplus

Consumer Surplus and Demand

4.5 Network Externalities

Positive Network Externalities

Negative Network Externalities

*4.6 Empirical Estimation of Demand

The Statistical Approach to Demand Estimation

The Form of the Demand Relationship

Interview and Experimental Approaches to Demand Determination

Summary

Questions for Review

Exercises

5 Uncertainty and Consumer Behavior

5.1 Describing Risk

Table of Contents

- Probability
- Expected Value
- Variability
- Decision Making

5.2 Preferences Toward Risk

- Different Preferences Toward Risk

5.3 Reducing Risk

- Diversification
- Insurance
- The Value of Information

*5.4 The Demand for Risky Assets

- Assets
- Risky and Riskless Assets
- Asset Returns
- The Trade-Off Between Risk and Return
- The Investors Choice Problem

Summary

Questions for Review

Exercises

6 Production

The Production Decisions of a Firm

6.1 Firms and Their Production Decisions

- Why Do Firms Exist?
- The Technology of Production
- The Production Function
- The Short Run versus the Long Run

6.2 Production with One Variable Input (Labor)

- Average and Marginal Products
- The Slopes of the Product Curve
- The Average Product of Labor Curve
- The Marginal Product of Labor Curve
- The Law of Diminishing Marginal Returns
- Labor Productivity

6.3 Production with Two Variable Inputs

- Isoquants
- Input Flexibility

Table of Contents

- Diminishing Marginal Returns
- Substitution Among Inputs
- Production FunctionsTwo Special Cases

6.4 Returns to Scale

- Describing Returns to Scale

Summary

Questions for Review

Exercises

7 The Cost of Production

7.1 Measuring Cost: Which Costs Matter?

- Economic Cost versus Accounting Cost
- Opportunity Cost
- Sunk Costs
- Fixed Costs and Variable Costs
- Fixed versus Sunk Costs
- Marginal and Average Cost

7.2 Cost in the Short Run

- The Determinants of Short-Run Cost
- The Shapes of the Cost Curves

7.3 Cost in the Long Run

- The User Cost of Capital
- The Cost-Minimizing Input Choice
- The Isocost Line
- Choosing Inputs
- Cost Minimization with Varying Output Levels
- The Expansion Path and Long-Run Costs

7.4 Long-Run versus Short-Run Cost Curves

- The Inflexibility of Short-Run Production
- Long-Run Average Cost
- Economies and Diseconomies of Scale
- The Relationship between Short-Run and Long-Run Cost

7.5 Production with Two OutputsEconomies of Scope

- Product Transformation Curves
- Economies and Diseconomies of Scope
- The Degree of Economies of Scope

*7.6 Dynamic Changes in Costs The Learning Curve

Table of Contents

Graphing the Learning Curve

Learning versus Economies of Scale

*7.7 Estimating and Predicting Cost

Cost Functions and the Measurement of Scale Economies

Summary

Questions for Review

Exercises

8 Profit Maximization and Competitive Supply

8.1 Perfectly Competitive Markets

When Is a Market Highly Competitive?

8.2 Profit Maximization

Do Firms Maximize Profit?

Alternative Forms of Organization

8.3 Marginal Revenue, Marginal Cost, and Profit Maximization

Demand and Marginal Revenue for a Competitive Firm

Profit Maximization by a Competitive Firm

8.4 Choosing Output in the Short Run

Short-Run Profit Maximization by a Competitive Firm

When Should the Firm Shut Down?

8.5 The Competitive Firms Short-Run Supply Curve

The Firms Response to an Input Price Change

8.6 The Short-Run Market Supply Curve

Elasticity of Market Supply

Producer Surplus in the Short Run

8.7 Choosing Output in the Long Run

Long-Run Profit Maximization

Long-Run Competitive Equilibrium

Economic Rent

Producer Surplus in the Long Run

8.8 The Industrys Long-Run Supply Curve

Constant-Cost Industry

Increasing-Cost Industry

Decreasing-Cost Industry

The Effects of a Tax

Long-Run Elasticity of Supply

Summary

Table of Contents

Questions for Review

Exercises

9 The Analysis of Competitive Markets

9.1 Evaluating the Gains and Losses from Government PoliciesConsumer and Producer Surplus

Review of Consumer and Producer Surplus

Application of Consumer and Producer Surplus

9.2 The Efficiency of a Competitive Market

9.3 Minimum Prices

9.4 Price Supports and Production Quotas

Price Supports

Production Quotas

9.5 Import Quotas and Tariffs

9.6 The Impact of a Tax or Subsidy

The Effects of a Subsidy

Summary

Questions for Review

Exercises

Part Three Market Structure and Competitive Strategy

10 Market Power: Monopoly and Monopsony

10.1 Monopoly

Average Revenue and Marginal Revenue

The Monopolists Output Decision

An Example

A Rule of Thumb for Pricing

Shifts in Demand

The Effect of a Tax

*The Multiplant Firm

10.2 Monopoly Power

Production, Price, and Monopoly Power

Measuring Monopoly Power

The Rule of Thumb for Pricing

10.3 Sources of Monopoly Power

The Elasticity of Market Demand

The Number of Firms

Table of Contents

The Interaction Among Firms

10.4 The Social Costs of Monopoly Power

Rent Seeking

Price Regulation

Natural Monopoly

Regulation in Practice

10.5 Monopsony

Monopsony and Monopoly Compared

10.6 Monopsony Power

Sources of Monopsony Power

The Social Costs of Monopsony Power

Bilateral Monopoly

10.7 Limiting Market Power: The Antitrust Laws

Restricting What Firms Can Do

Enforcement of the Antitrust Laws

Antitrust in Europe

Summary

Questions for Review

Exercises

11 Pricing with Market Power

11.1 Capturing Consumer Surplus

11.2 Price Discrimination

First-Degree Price Discrimination

Second-Degree Price Discrimination

Third-Degree Price Discrimination

11.3 Intertemporal Price Discrimination and Peak-Load Pricing

Intertemporal Price Discrimination

Peak-Load Pricing

11.4 The Two-Part Tariff

*11.5 Bundling

Relative Valuations

Mixed Bundling

Bundling in Practice

Tying

*11.6 Advertising

A Rule of Thumb for Advertising

Table of Contents

Summary

Questions for Review

Exercises

12 Monopolistic Competition and Oligopoly

12.1 Monopolistic Competition

The Makings of Monopolistic Competition

Equilibrium in the Short Run and the Long Run

Monopolistic Competition and Economic Efficiency

12.2 Oligopoly

Equilibrium in an Oligopolistic Market

The Cournot Model

The Linear Demand CurveAn Example

First Mover AdvantageThe Stackelberg Model

12.3 Price Competition

Price Competition with Homogeneous ProductsThe Bertrand Model

Price Competition with Differentiated Products

12.4 Competition versus Collusion: The Prisoners Dilemma

12.5 Implications of the Prisoners Dilemma for Oligopolistic Pricing

Price Rigidity

Price Signaling and Price Leadership

The Dominant Firm Model

12.6 Cartels

Analysis of Cartel Pricing

Summary

Questions for Review

Exercises

13 Game Theory and Competitive Strategy

13.1 Gaming and Strategic Decisions

Noncooperative versus Cooperative Games

13.2 Dominant Strategies

13.3 The Nash Equilibrium Revisited

Maximin Strategies

*Mixed Strategies

13.4 Repeated Games

13.5 Sequential Games

Table of Contents

The Extensive Form of a Game

The Advantage of Moving First

13.6 Threats, Commitments, and Credibility

Empty Threats

Commitment and Credibility

Bargaining Strategy

13.7 Entry Deterrence

Strategic Trade Policy and International Competition

*13.8 Auctions

Auction Formats

Valuation and Information

Private-Value Auctions

Common-Value Auctions

Maximizing Auction Revenue

Bidding and Collusion

Summary

Questions for Review

Exercises

14 Markets for Factor Inputs

14.1 Competitive Factor Markets

Demand for a Factor Input When Only One Input Is Variable

Demand for a Factor Input When Several Inputs Are Variable

The Market Demand Curve

The Supply of Inputs to a Firm

The Market Supply of Inputs

14.2 Equilibrium in a Competitive Factor Market

Economic Rent

14.3 Factor Markets with Monopsony Power

Monopsony Power: Marginal and Average Expenditure

Purchasing Decisions with Monopsony Power

Bargaining Power

14.4 Factor Markets with Monopoly Power

Monopoly Power over the Wage Rate

Unionized and Nonunionized Workers

Summary

Questions for Review

Table of Contents

Exercises

15 Investment, Time, and Capital Markets

15.1 Stocks versus Flows

15.2 Present Discounted Value

Valuing Payment Streams

15.3 The Value of a Bond

Perpetuities

The Effective Yield on a Bond

15.4 The Net Present Value Criterion for Capital Investment Decisions

The Electric Motor Factory

Real versus Nominal Discount Rates

Negative Future Cash Flows

15.5 Adjustments for Risk

Diversifiable versus Nondiversifiable Risk

The Capital Asset Pricing Model

15.6 Investment Decisions by Consumers

15.7 Investments in Human Capital

*15.8 Intertemporal Production Decisions Depletable Resources

The Production Decision of an Individual Resource Producer

The Behavior of Market Price

User Cost

Resource Production by a Monopolist

15.9 How Are Interest Rates Determined?

A Variety of Interest Rates

Summary

Questions for Review

Exercises

Part Four Information, Market Failure, and the Role of Government

16 General Equilibrium and Economic Efficiency

16.1 General Equilibrium Analysis

Two Interdependent Markets Moving to General Equilibrium

Reaching General Equilibrium

Economic Efficiency

16.2 Efficiency in Exchange

The Advantages of Trade

Table of Contents

- The Edgeworth Box Diagram
- Efficient Allocations
- The Contract Curve
- Consumer Equilibrium in a Competitive Market
- The Economic Efficiency of Competitive Markets

16.3 Equity and Efficiency

- The Utility Possibilities Frontier
- Equity and Perfect Competition

16.4 Efficiency in Production

- Input Efficiency
- The Production Possibilities Frontier
- Output Efficiency
- Efficiency in Output Markets

16.5 The Gains from Free Trade

- Comparative Advantage
- An Expanded Production Possibilities Frontier

16.6 An OverviewThe Efficiency of Competitive Markets

16.7 Why Markets Fail

- Market Power
- Incomplete Information
- Externalities
- Public Goods

Summary

Questions for Review

Exercises

17 Markets with Asymmetric Information

17.1 Quality Uncertainty and the Market for Lemons

- The Market for Used Cars
- Implications of Asymmetric Information
- The Importance of Reputation and Standardization

17.2 Market Signaling

- A Simple Model of Job Market Signaling
- Guarantees and Warranties

17.3 Moral Hazard

17.4 The PrincipalAgent Problem

- The PrincipalAgent Problem in Private Enterprises

Table of Contents

The Principal-Agent Problem in Public Enterprises

Incentives in the Principal-Agent Framework

*17.5 Managerial Incentives in an Integrated Firm

Asymmetric Information and Incentive Design in the Integrated Firm

Applications

17.6 Asymmetric Information in Labor Markets: Efficiency Wage Theory

Summary

Questions for Review

Exercises

18 Externalities and Public Goods

18.1 Externalities

Negative Externalities and Inefficiency

Positive Externalities and Inefficiency

18.2 Ways of Correcting Market Failure

An Emissions Standard

An Emissions Fee

Standards versus Fees

Tradeable Emissions Permits

Recycling

18.3 Stock Externalities

Stock Buildup and Its Impact

18.4 Externalities and Property Rights

Property Rights

Bargaining and Economic Efficiency

Costly Bargaining The Role of Strategic Behavior

A Legal Solution Suing for Damages

18.5 Common Property Resources

18.6 Public Goods

Efficiency and Public Goods

Public Goods and Market Failure

Summary

Questions for Review

Exercises

19 Behavioral Economics

19.1 Reference Points and Consumer Preferences

Table of Contents

19.2 Fairness

19.3 Rules of Thumb and Biases in Decision Making

19.4 Bubbles

Informational Cascades

19.5 Behavioral Economics and Public Policy

Summing Up

Summary

Questions for Review

Exercises

Appendix: The Basics of Regression

Glossary

Answers to Selected Exercises
