# Table of Contents

## Modeling and Simulation in CSR and Sustainable Development

- Can Board Diversity Enhance the Integration of ESG Aspects in Management System? .................................................. 1  
  *Idoya Ferrero-Ferrero, María Ángeles Fernández-Izquierdo, and María Jesús Muñoz-Torres*

- Application of the HJ Biplot Methodology to Variation Greenhouse Gas Emissions in International Companies .................. 10  
  *Jennifer Martínez-Ferrero and Isabel Gallego-Álvarez*

- Introducing Integrated Acceptance and Sustainability Assessment of Technologies: A Model Based on System Dynamics Simulation ...... 23  
  *Dace Aizstrausta and Egils Ginters*

- Incorporating Stakeholders’ Preferences into CSR Ratings: Fuzzy TOPSIS Approach to Evaluate Agri-Food Companies .................. 31  
  *Elena Eserig-Olmedo, María Jesús Muñoz-Torres, María Ángeles Fernández-Izquierdo, and Juana María Rivera-Lirio*

- How to Apply Model Driven Engineering to Develop Corporate Social Responsibility Computer Systems ............................. 42  
  *Cristina Campos and Reyes Grangel*

## Modeling and Simulation in Finance and Accounting

- A Model for Estimating Cash Flows in Firms Backed by Venture Capital ................................................................. 51  
  *Iván Arribas, Elisabeth Bustos, and Gregorio Labatut*

- Non-linear Tradeoff between Risk and Return: A Regime-switching Multi-factor Framework ........................................... 64  
  *Vicent Aragó and Enrique Salvador*

- Generalizing Some Usual Risk Measures in Financial and Insurance Applications .......................................................... 75  
  *Jaume Belles-Sampera, Montserrat Guillén, and Miguel Santolino*

- Risk Behavior of Stock Markets Before and After the Subprime Crisis ........................................................................... 83  
  *Esteban Otto Thomasz and Aurelio Fernández Bariviera*
