Preface XIII

1	Chemical Product Design – a New Approach in Product and Process Development	1
	Summary	1
1.1	Definitions	1
1.2	Customer Involvement	3
1.3	Specifications	8
1.4	Tasks of Development Team	8
1.5	Steering of Projects	11
1.6	Learnings	13
	References	13
2	Diversity of Product Design	15
	Summary	15
2.1	General Remarks	15
2.2	Customizable Developments	16
2.3	Foodstuffs	18
2.4	Chemicals	20
2.5	Cosmetics and Pharmaceuticals	22
2.6	Polymers and Plastics	24
2.7	Ceramic Industry	27
2.8	Packaging	27
2.9	Brand	28
2.10	Learnings	30
3	Generation and Assessment of Ideas for Novel Products	31
	Summary	31
3.1	Innovation	31
3.2	Implementation of a Product Idea	32
3.3	Project Success (Some Personal Reflections on the People Involved)	32
3.4	Generation of Innovations	34

3.5	Evaluation of Product Ideas	37
3.6	Learnings	38
	References	38
4	Compressed Development and Implementation of Innovations	39
	Summary	39
4.1	Preliminary Remarks	39
4.2	Reasons for an Accelerated Product Development	40
4.3	Risks	41
4.4	Barriers in Development Projects	42
4.5	History	43
4.6	Compressed Project Processing	43
4.7	Project Leadership	45
4.8	Teamwork in Projects	47
4.9	Conditions for Success of Compressed Project Work	48
4.10	Design of Production Plant	49
4.11	Biotechnology	51
4.12	Maximum Speed-to-Market (Examples)	52
4.13	Relationship between Compressed Development and Product Design	54
4.14	Outlook	54
4.15	Learnings	55
	References	55
5	Product Design of Particles	57
	Summary	57
5.1	Dry Agglomeration Processes: Pelletizing and Tableting	57
5.2	Wet Agglomeration Process: Granulation	64
5.2.1	Definition of Granulation	64
5.2.2	Tasks of Granulation	65
5.2.3	Theoretical Basics	67
5.2.4	Mechanisms of Granulation	69
5.2.5	Industrial Granulation	73
5.2.6	Scale-Up	77
5.2.7	Applications	79
5.2.8	Design of Particles by Granulation	81
5.3	Learnings	86
	References	87
6	Product Design of Particles by Coatings	91
	Summary	91
6.1	Processes for Setting the Product Design of Particles	91
6.2	Opportunities for Influencing Particle Design	92
6.3	Tasks of Coatings	95
6.4	Basic Variants of Coating	99

6.5	Coating Technologies	107
6.6	Learnings	117
	References	118
7	Product Design Out of Disperse and Continuous Phases by Crushing	119
	Summary	119
7.1	Breaking Up of Materials	119
7.2	Importance of Crushing Processes	121
7.3	Particle Properties by Breaking Up	122
7.4	Variants of Crushing	126
7.4.1	Grinding of Solids	128
7.4.2	Deagglomeration	131
7.4.3	Split Up Sensitive Materials in a Cold Milling Process	132
7.4.4	Milling of Suspended Solids	132
7.4.5	Breaking Down and Transforming of Liquids into Dispersed Solids	133
7.4.6	Splitting with Simultaneous Absorbing/Reaction	133
7.5	Processes for Crushing of Materials	133
7.5.1	Equipment for Grinding of Disperse Dry Raw Materials	134
7.5.2	Equipment for Grinding of Disperse Raw Materials in Liquid Phases	137
7.5.3	Breaking Up of Materials in Combination with Drying Methods	142
7.6	Energy Requirements	144
7.7	Determination of Product Design via Specifications	147
7.8	Design of Products by Breaking-Up Processes	148
7.8.1	Determination of Particle Properties for Solids	149
7.8.2	Solids from Melting	150
7.9	Product Design Out of Multistep Processes (Examples)	151
7.9.1	Powders from Molten Metals	151
7.9.2	Powdered Metals for Metallic Paints	153
7.9.3	Reinforcing Materials and Fillers for Polymers	154
7.10	Consequences	155
7.11	Learnings	156
	References	156
8	Product Design Out of Continuous Phases by Spray Drying and Crystallization	159
	Summary	159
8.1	Importance of Spray Drying	159
8.2	Basics of Atomization and Drying	161
8.2.1	Atomizing with Nozzles	161
8.2.2	Description of Drying and Structure Formation	161
8.2.3	Industrial Spray Drying	163
8.3	Spray Drying Plants and Plant Safety	164

8.4	Improved Capacity and Energy Consumption	169
8.5	Influencing the Product Design	176
8.5.1	Choice of Atomizer and of Operating Mode	179
8.5.2	Material Dependence of Particle Design	180
8.5.3	Agglomeration of Droplets and Particles	184
8.5.4	Recirculation of Coarse Particles and Dust	184
8.6	Scale-Up of Spray Dryers	187
8.7	Exhausted Air and Waste Water	189
8.8	Spray Agglomeration	190
8.9	Crystallization/Precipitation	192
8.10	Learnings	194
	References	195
9	Manufacturing of Application-Related Designed Plastic Products	197
	Summary	197
9.1	Polymers	197
9.2	Importance of Plastics	199
9.3	Task	201
9.4	Product Design for Plastics	202
9.4.1	Polymer Engineering	202
9.4.2	Polymer Design	205
9.4.3	Polymer Shaping	208
9.5	Polymers in Detergent Formulations	211
9.5.1	Cobuilder	211
9.5.2	Inhibitors (Graying, Color Transfer, Foam, and Dirt)	212
9.5.3	Excipients and Starches	213
9.6	Plastics in Detergent Industry	213
9.6.1	Packaging	213
9.6.2	Polyvinyl Alcohol as Packaging Material	218
9.7	Shape and Function	222
9.8	Learnings	223
	References	224
10	Production of Tailor-Made Enzymes for Detergents	225
	Summary	225
10.1	Product Design in Biotechnology	225
10.2	History	226
10.3	Enzymes	228
10.3.1	Enzymes as Part of White Biotechnology	228
10.3.2	Enzymes as Catalysts of Metabolism in Living Cells	230
10.3.3	Structure of Enzymes	231
10.4	Enzymes in Detergents	232
10.4.1	Significance	232
10.4.2	Optimizations of Production Strain	233
10.5	Industrial Manufacture of Proteases	235

10.5.1	Materials for the Plant	236
10.5.2	Three-Step Process	236
10.5.3	Fermentation	238
10.5.4	Downstream Processing of Fermentation Broths	239
10.5.5	Manufacturing of Enzyme Granules	242
10.6	Workplace Safety	248
10.7	Product Design of Enzymes	249
10.8	Learnings	250
	References	251
11	Design of Solid Laundry Detergents According to Consumer Requirements	253
	Summary	253
11.1	Market Products in Germany	253
11.2	Identification and Consideration of Customer Needs	255
11.3	History of Laundry Washing	258
11.4	Washing Process	259
11.5	Recipe	265
11.6	Design of Finished Products	267
11.7	Manufacturing Processes	270
11.7.1	Drying in Spray Towers for Customary Powders	271
11.7.2	Combined Spraying with Compacting Processes for Concentrates	273
11.7.3	Non-Tower Method	274
11.8	Novel Manufacturing Method for Granules	277
11.9	Economic Considerations	280
11.10	Outlook	281
11.11	Learnings	283
	References	283
12	Product Design of Liquids	285
	Summary	285
12.1	Introduction	285
12.2	Water-Based Liquids	286
12.3	Water-Insoluble Liquids (Example: Perfume Oils)	290
12.3.1	History of Perfume Oils	290
12.3.2	Perfumes	291
12.3.3	Extraction of Fragrances	294
12.3.4	Chemical Composition of Natural Fragrances	298
12.3.5	Possibilities in Product Design of Perfume Oils	299
12.3.6	Emulsions	302
12.3.7	Scented Solids	303
12.3.8	Neuromarketing	306
12.3.9	Perfume Oil for Space Fragrancing	306
12.3.10	Perfume Oils for Detergents	307

12.3.11	Manufacture of Fragrance Beads	311
12.3.12	Personal Care and Other Products	313
12.3.13	Safety	314
12.4	Learnings	316
	References	316
13	Design of Skin Care Products	319
	Summary	319
13.1	History of Cosmetics	319
13.2	Regulations of Cosmetic Products	320
13.3	Product Design	322
13.4	Skin Care	324
13.4.1	Cosmetic Products for Beautification	325
13.4.2	Active Cosmetics for Healthy Skin	326
13.4.3	Differences between Cosmeceuticals and Drugs	327
13.4.4	Natural Cosmetics Label	329
13.5	Emulsions	330
13.5.1	Basics (Definition, Structure, and Classification)	330
13.5.2	Stability of Emulsions	333
13.5.3	Preparation of Emulsions in the Laboratory	335
13.6	Structure of Skin Care Creams	336
13.6.1	Excipients	336
13.6.2	Preservations	338
13.6.3	Additives	340
13.6.4	Cosmetic Active Ingredients	341
13.6.5	Typical Effects of Cosmetics	341
13.7	Essential Active Substances from a Medical Point of View	341
13.7.1	Linoleic and Linolenic	344
13.7.2	Urea	344
13.7.3	Panthenol	344
13.8	Penetration into the Skin	345
13.8.1	Skin Structure	345
13.8.2	Applying the Emulsion	346
13.8.3	Proof of Performance	346
13.8.4	Penetration of Lipophilic Substances	348
13.9	Targeted Product Design in the Course of Development	351
13.10	Production of Skin Care Products	353
13.11	Bottles and Prices of Cosmetic Creams	362
13.12	Design of all Elements	365
13.13	Learnings	366
	References	367
14	Influencing the Product Design by Chemical Reactions and the Manufacturing Process	371
	Summary	371

14.1	General Remarks	371
14.2	Elements of the Manufacturing Process	372
14.3	Raw Materials and Synthesis Routes	373
14.4	Chemical Reactor and Reaction Sequence	375
14.5	Entire Procedure	380
14.6	Choice of Machines and Apparatuses	383
14.7	Operating Conditions	386
14.8	Drying Gas	387
14.9	Learnings	389
	References	390
15	Design of Disperse Solids by Chemical Reactions	391
	Summary	391
15.1	Importance of Solid-State Reactions	391
15.2	Theoretical Bases	392
15.3	Modeling of Isothermal Solid-State Reactions	393
15.4	Modeling of "Adiabatic" Solid Reactions	395
15.5	Reactions of Disperse Particles in the Industry	395
15.5.1	Conversions with Gases	395
15.5.2	Reactions of Particles with Liquids	399
15.5.3	Conversions in Liquids	402
15.5.4	Reactive Suspension Precipitations	403
15.6	Formation of Products	404
15.6.1	Product Formation in Fluid/Solid Reactions	404
15.6.2	Product Formation through Reactions in Suspension	406
15.6.3	Influencing the Product Design	407
15.7	Etherification of Cellulose	409
15.8	Dry Neutralization	414
15.8.1	Raw Materials	414
15.8.2	Chemical Formulas	414
15.8.3	Modeling of the Reaction Processes	415
15.8.4	Reaction Sequence	415
15.9	Building Materials	418
15.10	Hints for Practice	419
15.11	Learnings	420
	References	420
16	Materials for the Machinery	423
	Summary	423
16.1	Motivation	423
16.2	Relationship between Material and Product Design	424
16.3	Choice of Material	425
16.4	Stainless Steel	426
16.4.1	Standard Grade	427
16.4.2	Corrosion	428

16.4.3	Smoothing the Metal Surfaces	430
16.4.3.1	Preparations	430
16.4.3.2	Mechanical Procedures	431
16.4.3.3	Pickling	432
16.4.3.4	Electropolishing	433
16.4.3.5	Plasma Polishing	436
16.5	Nonferrous (NF) Metals and Alloys	437
16.6	Inorganic Nonmetallic Materials	440
16.6.1	Borosilicate Glass	440
16.6.2	Vitreous Enamel	441
16.6.3	Graphite	442
16.7	Plastics	443
16.8	Learnings	447
	References	448
17	Principles of Product Design	449
	Summary	449
17.1	Characteristic Features	449
17.2	Targeted Production of Particles and Fluids from Different Raw Materials	450
17.3	Learnings	453
	 List of Companies	 455
	 Index	 461
