Content

Abbreviations 19

I. Introduction 23
  1. Rationale for research 23
  2. Methodology and course of investigation 25

II. Background 29
  1. The problematic nature of seaport development 29
     a) Seaports and their development 29
     b) Case Studies 32
        aa) The Port of Hamburg, Germany 32
            i) The German port sector 32
            ii) The Port of Hamburg and the 9th dredging of the Elbe 34
        bb) The Port of Tauranga, New Zealand 36
            i) The New Zealand port sector 36
            ii) The Port of Tauranga and plans for its development 37
     c) Problems associated with port development 38
     d) Summary 41
  2. The instrument of assessing alternatives 41
     a) Alternatives and their use in decision-making 42
        aa) Terminological origin 42
        bb) Rational decision-making theory 43
        cc) Decision-making in administrative and policy spheres 46
        dd) Environmental decision-making 49
     b) Essential elements of the technique to assess alternatives 54
        aa) Process/scheme of assessing alternatives 54
        bb) The range of alternatives 55
           i) Need for limitation to “reasonable” alternatives 55
           ii) Factors influencing the range of “reasonable” alternatives 56
Content

cc) Types of alternatives 59
   i) The “no-action”/“zero” alternative 59
   ii) Alternative locations/sites 60
   iii) Technical/design alternatives 61
   iv) Conceptual alternatives 62

c) Conclusions 63

3. Chapter II in a nutshell 63

III. The assessment of alternatives during planning and approval in Germany 65

1. Conflict resolution through planning and approval in Germany 65
   a) Structure of the German planning and approval regime 66
      aa) Strategic planning in Germany 66
      bb) Processes upstream of final approval 68
      cc) Approval as the final planning step 69
      dd) Integration of environmental concerns into planning and approval 72
         i) Assessment of environmental effects of projects (EIA) 72
         ii) Strategic environmental assessment (SEA) of plans and programmes 74
   b) The German concept of discretion 77
      aa) Types of discretionary freedom 77
      bb) Boundaries and control 79
   c) Conclusions 82

2. The current state of legal opinion regarding the assessment of alternatives 82
   a) The assessment of alternatives during strategic planning 83
      aa) As part of planning itself 83
         i) Sectoral planning 83
         ii) Spatial planning 84
      bb) As part of Strategic Environmental Assessment (SEA) 85
         i) General 85
         ii) “Reasonableness” of alternatives 88
         iii) Types of alternatives 91
         iv) Depth of assessment 92
cc) As part of assessing the compatibility of plans and programmes with FFH-conservation objectives 93
   i) The exemption clause of §§ 34(3), 36 BNatSchG 93
   ii) “Reasonableness” of alternatives under §§ 34(3) cl 2, 36 BNatSchG 96
   iii) Alternatives subject to assessment 97
dd) Summary 98

b) The assessment of alternatives in processes upstream of approval 99
   aa) The regional planning procedure – Raumordnungsverfahren 99
      i) Alternatives as part of the regional planning procedure under § 15(1) cl 3 ROG 99
      ii) Alternatives as part of EIA under § 16(1) UVPG 102
      iii) Alternatives as part of the FFH-exemption clause 103
   bb) The planning and determination of routes – § 13 WaStrG 104
      i) Alternatives as part of route determination and environmental assessment 104
      ii) Alternatives assessment under the FFH-regime 106
   cc) Summary 107

c) Assessing alternatives during final approval “Planfeststellung” 108
   aa) The weighing up requirement 109
      i) Obligation for the assessment of alternatives 109
      ii) Alternatives that “impose themselves” 112
      iii) Alternatives subject to assessment 114
         (1) Conceptual alternatives 114
         (2) Alternative locations and routes 115
         (3) Technical/design alternatives 118
         (4) Zero/no-action alternative 118
   bb) Environmental Impact Assessment (EIA) 119
      i) The requirement to assess alternatives as part of EIA 119
      ii) Obligations of authority 121
      iii) Alternatives subject to assessment 122
   cc) FFH-exemption clause 125
      i) The exemption rule of § 34(3) BNatSchG 125
      ii) Imperative reasons of overriding public interest 128
      iii) “Reasonable alternatives” under § 34(3) no 2 BNatSchG 131
(1) Orientation on the project's purpose 131
(2) Without any or with fewer adverse impacts upon Natura 2000 conservation aims 133
(3) Proportionality of alternatives 133
iv) Alternatives subject to assessment for the exceptional approval 134
(1) Technical/design alternatives 135
(2) Alternative locations 135
(3) Zero alternative 137
(4) Conceptual alternatives 137

dd) Avoidance of adverse effects on nature and landscape under §§ 14ff BNatSchG 138

ee) Summary 140
d) Conclusions 142

3. The consideration of alternatives in the case of the Elbe deepening 143
a) Strategic planning 143
aa) Sectoral planning 144
i) National Port Concept 144
ii) The Federal Transport Infrastructure Plan (FTIP) 147
iii) Summary of findings 154
bb) Spatial planning 155
i) National Spatial Port Plan according to § 17(2) ROG 155
ii) Spatial plans & programmes of the federal states 157
(1) Lower Saxony Spatial Development Programme (LROP) 2008 159
(2) Schleswig-Holstein State Development Plan (LEP S-H) 2010 161
(3) Hamburg Land-Use Plan and Port Development Plan (HEP) 163
(4) Summary 165
iii) Summary 165
cc) Summary 166
b) Upstream processes: Regional planning procedure and route determination 166
aa) Obligation to undertake upstream procedures 167
bb) Argument of the authorities for omitting procedures 167
cc) Summary 168
c) Final approval/Planfeststellung of the Elbe deepening 169
aa) Course of procedure 170
bb) Plan justification and the “zero” alternative 172
   i) The planning objective and justification 172
   ii) Public interest 173
   iii) The “zero” alternative 174
cc) The assessment of alternatives as part of the
    weighing up requirement 174
    i) General remarks 174
    ii) Alternatives assessed but dismissed 175
        (1) Reduced speed of ships 175
        (2) Technical measures for raising water levels 175
        (3) Changes in the dimensions of the shipping channel 176
    iii) Alternatives explicitly excluded from assessment 176
dd) The assessment of alternatives as part of EIA 179
ee) The assessment of alternatives as part of
    FFH-exemption procedure 180
    i) General 180
    ii) Imperative reasons of overriding public interest 180
    iii) Alternatives assessed 184
ff) The assessment of alternatives as part of the
    obligation to avoid impacts on nature and landscape 186
gg) Summary 187
d) Conclusions 188

IV. The assessment of alternatives during planning
and consenting in New Zealand 191

1. Conflict resolution through planning and consenting in New Zealand 191
   a) From sectoral resource management to integrated
      environmental resource management 191
   b) Environmental management under the RMA 193
      aa) General 193
      bb) Purpose and principles of the Resource Management Act (RMA) 196
      cc) National and regional planning instruments 198
      dd) Approval/resource consents 200
   c) Transport and port sector planning 201
Content

d) The New Zealand concept of discretion 204
e) Summary 205

2. Current state of legal opinion regarding the assessment of alternatives 205
a) The assessment of alternatives during port planning 205
b) The assessment of alternatives as part of strategic planning under the RMA 206
   aa) As part of planning itself 206
   bb) Section 32 analysis 207
      i) Content, purpose and development 207
      ii) The “appropriateness” test 210
      iii) Scope and depth of alternatives assessment 213
   cc) Summary 216

c) Alternatives and resource consents under the RMA 216
   aa) The resource consent procedure 216
   bb) The substantive requirements 219
      i) Matters to be considered for resource consents under s 104 219
      ii) Effects on the environment 220
   cc) Locating the technique of assessing alternatives 222
      i) Alternatives and assessment of environmental effects – s 88, Sch 4 222
      ii) Alternatives as “further information” under s 92 225
      iii) Alternatives as “other matters” to be considered under s 104(1)(c) 226
      iv) Alternatives and the efficiency criterion of s 7(b) 228
   dd) Summary 232

3. The consideration of alternatives in the case of the Port of Tauranga development 232
a) Transport and port planning 233
   aa) The 2011 Connecting New Zealand transport policy 233
   bb) National Infrastructure Plan (NIP) 2011 234
b) Planning under the RMA 235
   aa) The New Zealand Coastal Policy Statement (NZCPS) 235
      i) Overview, purpose and development of the NZCPS 235
      ii) Guidance of the NZCPS 2010 with regard to port location 237
      iii) The consideration of alternatives during the policy development process 240
         (1) Alternatives and the proposed NZCPS 2008 240
         (2) Alternatives and the NZCPS 2010 241
bb) Regional documents
   i) The Bay of Plenty Regional Policy Statement (BoP RPS) 244
      (1) Background and relevant content 244
      (2) The assessment of alternatives as part of the s 32 analysis 246
   ii) The Bay of Plenty Regional Coastal Environment Plan (RCEP) 249
      (1) Background and relevant content 249
      (2) The assessment of alternatives during the RCEP development process 252
cc) Summary 253

c) Resource consenting process of the Port of Tauranga dredging 254
   aa) Course of procedure 254
   bb) Justification and economic rationale for channel deepening and widening 256
cc) Alternatives in documents developed in the resource consent process 257
   i) The application (including AEE) 257
   ii) The Hearing Panel’s decision 259
   iii) The High Court’s decision 258
   iv) The Environment Court’s decision 261
dd) Summary 262

4. Chapter IV in a nutshell 263

V. Comparison, conclusions and recommendations 265

1. Comparison 265
   a) General 265
      aa) Structure of legal systems and competencies for port development 265
      bb) Discretion & judicial control 266
      cc) Environmental assessment 267
   b) The assessment of alternatives during planning and approval 269
      aa) Statutory obligations for alternatives assessment 269
      bb) Formal matters 273
         i) Competencies for alternative assessment 273
         ii) Process of alternative assessment 274
Content

iii) Opportunities for public participation 275
iv) Binding force, legal protection and review 277

cc) Substantive requirements 280
i) Strategic level 280
ii) Upstream level 284
iii) Approval level 285

dd) Implementation of requirements 287
c) Conclusion 291

2. Evaluation and conclusions 292
a) General 292
b) Common problems under both legal regimes 293
aa) Unclear assessment process 293
bb) Dominance of proponent 295
cc) Insufficient public participation and communication 297
dd) Binding force, legal protection and review 304
e) Overall integration in the multi-level planning regimes 307
ff) The challenge of identifying the range of relevant alternatives 313
c) Problems specific to the planning level and/or country 318
aa) Port and transport planning 318
i) Germany 319
(1) Overview 319
(2) National Ports Concept 320
(3) Federal Transport Infrastructure Planning 322
ii) New Zealand 326
(1) The current management approach for port development 326
(2) The potential of SEA in transport 328
bb) Spatial/environmental planning 330
i) Germany 331
(1) National Spatial Plan for Ports 331
(2) Regional spatial plans of the federal states 332
ii) New Zealand 335
(1) The assessment of alternatives under s 32 until 4 December 2013 336
(2) The new RMA s 32 (in effect since 4 December 2013) 342
(3) National and Regional Planning Instruments 345
cc) Upstream processes 347
i) Germany 348
(1) Focus on alternative locations and routes 348
