PREFACE	vii
-------------------	-----

I. INTRODUCTION: NATURE AND SCOPE OF METAPHYSICS	1
--	---

Unity in scientific knowledge. Supreme attempt at unification. Advantage of supreme unification. Less complete attempts at unification. Habit of metaphysical thinking: wisdom. Metaphysics defined. Metaphysical and scientific thinking contrasted. Central problem of metaphysics. Senses and intellect not contradictory. Nature of Thomistic metaphysics. Threefold application of potency-limiting-act principle. Participated being and the existence of God. Metaphysics and revealed theology proper. Participation and hierarchy in being. Extrinsic principles of being: efficient and final causes. Transcendental properties of being. Objective reality and the notion of being in Thomistic metaphysics. Summary.

Part One: Representation of Being as Being in the Intellect—The Notion of Being

II. THINKING IN METAPHYSICS—THE ANALOGY OF BEING	19
--	----

A general definition of knowledge. Sources of error in knowledge. Unity required for knowledge. Need for acquired intellectual powers—the intellectual virtues. The intellectual virtues generally. Nature of intuition. Nature of scientific knowledge. Knowledge of the indi-

vidual. Thomistic theses on the nature of knowledge. Univocal predication in the sciences—induction and deduction. The methods of the sciences. Formal object as source of unity in the sciences. Distinctive character of thinking in the virtue of wisdom. Metaphysics as the supreme attempt at unification. Degrees of knowledge in relation to the metaphysical unification of reality. Character of natural or physical philosophy. Mathematical philosophy. Nature of metaphysical thinking in St. Thomas. Judgment act in metaphysical thinking. A modern Thomist's view of metaphysical knowledge. Notion of being as existing not properly a concept. Role of judgment in the metaphysical notion of being. Verb "is" cannot be mere copula. Unity of the act of judgment as the basis of unity of the notion of being. Analogical predication of the transcendental notion of being. Existential versus essentialistic metaphysics. The general notion of analogy. Classification of forms of analogy in St. Thomas. Analogy of proper proportionality. Analogy implies difference. Analogy of attribution in metaphysics. Need of analogy of intrinsic attribution in Thomistic metaphysics. Fundamental role of analogy of attribution. Role of analogy of proportionality. Notion of being includes the conceivable. Limitation of analogy of proportionality. Importance of intrinsic attribution. Proof from analogy for God's existence. Negative character of knowledge of God's nature. Summary. Analogy makes a natural theology possible. Thinking in the virtues of the practical intellect. Knowledge in art and prudence. Knowledge by connaturality. Divisions of philosophy based on the practical virtues.

III. FIRST PRINCIPLES OF BEING IN THE NOTION OF BEING

54

First principles immediately implied in the notion of being. Psychological priority of the principle of contradiction. IDENTITY. Priority of the principle of identity in the real order. Importance of the principle of identity. Principle of identity in relation to the act of existing. Justification of the principle of identity. Analogical predication of the transcendental principle of identity. Importance of analogical predication of the principle of identity. SUFFICIENT REASON OR INTELLIGIBILITY (CAUSALITY). Principle of sufficient reason or intelligibility (causality). Source of intelligibility. Justification of the principle of intelligibility. Analogical predication of the principle of intelligibility. Truth is a transcendental. Principle of causality as a necessary derivative of the principle of intelligibility. FINALITY. Principle of finality as an extension of the principle of intelligibility. Tentative and final statements of the principle of finality. Meaning of the principle of finality. Necessity of the principle of finality. Reciprocal influence of efficient and final cause. Analogical predication of the principle of finality. Principle of finality manifests an intelligibly planned universe. SUMMARY. All first principles of being are implicit in the metaphysical intuition of being. Metaphysical intuition of being and the field of metaphysics.

Part Two: Metaphysical Structure of Being as Being in Reality

IV. INTRINSIC PRINCIPLES OF BEING AS EXISTING: ESSENCE AND EXISTENCE 75

The unity of philosophical experience. Principle of unification in early Greek philosophy. Parmenides as the father of the metaphysical approach. Monistic answer of Parmenides. Importance of reality of the potential. Protest of Heraclitus. Inferiority of a philosophy of becoming. Parmenides establishes the central metaphysical problem. Widespread rejection of monism. Answer of Plato. Non-being in Plato. Parmenides apparently answered. Empty space as principle of limit. Evaluation of Plato's answer. Aristotle's answer to Parmenides. Being in Aristotle's metaphysics. Answer of St. Thomas suggested by Plato. Aid given to metaphysics by a natural philosophy. Passive potentiality as a principle of limitation. Meaning of participation. Finite beings not constituted by composition of essence and existence. Thomistic rejection of such a notion. Essence and existence principles as transcendental relations. Potency limiting act raised to a general principle of limitation. Notion of participation suggested by Plato. Thomistic texts on participation. Most comprehensive text. Thomistic summary. Aristotelian and Platonic contributions to the Thomistic answer. New character of Thomistic answer. Necessary inference to self-existing being. Objections to the Thomistic doctrine of participation: its inconceivability. Answer to the objection of inconceivability. Conceivable opposing explanations of limitations. Proper notion of limited being. Proof for real distinction from modes of thinking. Confidence in ability of intellect to know ultimate reality. Doctrine of distinctions in being based on modes of predication. Table of distinctions in being as being. Doctrine of participated being reflected in analogy of the notion of being. Test of Platonism and Aristotelianism by their views of analogy. Important implications of a doctrine of participation. The nature of God as implied in self-existence. Attributes of God's nature or essence. Attributes of God's activity. The Thomistic theses on God's existence and nature. Catholic dogma on knowledge of God by reason. Another form of the argument from participation.

V. INTRINSIC PRINCIPLES IN THE ESSENCE OF LIMITED BEINGS: MATTER AND FORM 116

Résumé of solution of the problem of individuality of beings. Similarity of individuals in a class. Individuality and individuation. The problem of individuation. The Thomistic solution to the problem of individuation. Role of matter in the Thomistic solution. Relation of form to matter. Description of principles of matter and form in

Thomistic metaphysics. Transcendental relation of matter and form. Modification in hylemorphism of man. Real distinction between matter and form. Participation in first and second applications of potency limiting act. Priority of first application. Unity of substantial form. Role of quantity in individuation. Importance of quantity. How quantity exercises its role in individuation. Thomistic statement on role of quantity. Individuation in the human substance. Individuation in Aristotle. Aristotle and St. Thomas compared. Reason for Aristotle's failure to explain the individual. Individuation in John Duns Scotus. Criticism of Scotus' position. Position of Suarez. Criticism of Suarez' position. Importance of sound solution to problem of individuation. Hylemorphism as a physical theory to explain substantial change. Example of change. Description of change. Requirements of change. Change implies essence-existence structure in changing being. Principle of change. Metaphysical necessity of principle of change. Theses on the nature and individuation of material substances. Objection to the hylemorphic doctrine of individuation. Answer to the objection. Hylemorphism as a physical and a metaphysical doctrine. Modern view of hylemorphism.

VI. THE HIERARCHY OF BEING: METAPHYSICS OF MAN AND ANGEL 143

Potency limiting act as a principle of gradation or hierarchy. Further inquiry into hierarchy of finite beings. Conceivability of purely immaterial substances—angels. Conceivability of beings of limited immateriality of form—man. METAPHYSICS OF PURELY MATERIAL SUBSTANCES. Hierarchy in purely material substances. METAPHYSICS OF MAN. Problem of the two contrary types of activity in man. Inference from two types of activities. Nature of man in Plato. Nature of man in Aristotle. Relation of human intellect to body in Aristotle. Man's unity not preserved in Aristotle. General character of Thomistic metaphysics of man. Form as substance. Man is not a soul. Human soul as independent substance is also form. Human soul as a substance confers existence on body. Soul and body in relation to existence. Characteristics of the human soul. Immortality of the human soul. Limit of proof for immortality. The separated and reunited human soul. Origin of the human soul. Time of infusion of soul. Subject must be prepared. Modern research and time of infusion. Essential union of body and soul in the human substance or person. High unity of human substance. Gradation within the class or species. Completeness of hierarchy in beings directly experienced. METAPHYSICS OF ANGELS. Conceivability of pure forms as subsistent beings in the hierarchy of beings. Arguments for actual existence of the angelic grade of beings. Evaluation of the arguments for existence of angels. Distinction in angelic substances. Angelic intellect. Intellect and will distinct. Angelic knowledge of God. Angelic will. Freedom in God and creatures. Human and angelic freedom compared. Importance of study of angels in metaphysics.

VII. INTRINSIC PRINCIPLES IN THE CHANGING INDIVIDUAL BEING: SUBSTANCE AND ACCIDENTS . . 172

Résumé. Problem of lesser changes in individual beings. Solution in third application of potency-limiting-act principle. Foundation in the being for accidents as second acts of existing. Necessary relation between the essence-existence composition and the substance-accident composition. Unity of substance-accident composition. Substantial and accidental existence distinguished. Aristotle's view of modes of existence in a being. Analogy of being in the categories. Proposed classification of categories or predicaments in St. Thomas. Minor differences in the classification plans. Comparison of Aristotle and St. Thomas on the categories.

VIII. SUBSTANCE: SUPPOSIT AND PERSON 183

Metaphysics of substance. Nature of substance. Substance in Aristotle and St. Thomas. Substance in Thomistic existentialism. Thomistic substance both predicamental and nonpredicamental. First principle of substance. Substance as support of accidents. Substance not necessarily limited. Reality of substance. Formal proof of substance. Substance and the nature of knowledge. Substance as demand of intellect. Origin of notion of substance. Erroneous views of substance. Substance and supposit. Completeness as source of perfections of supposit. Supposit as transcendental. Finite and Infinite supposit. Source of completeness in finite supposit. Finite supposit and existence. Human soul and supposit. Supposit and oneness. Incommunicability of the finite supposit. Communicability and existence. Finite incommunicability. Accidents and finite supposit. Substance not immediately potential to accidents. Powers and supposit. Supposit and person. Existence and person. Thomistic position. Divine Supposit and revelation. The revelation of the Incarnation and Person. Thomistic view avoids heresies. Service of metaphysics to theology proper.

IX. PROPER ACCIDENTS AND THEIR EXTRINSIC DENOMINATIONS; RELATION 215

Limitation of the being of accidents. Metaphysical consideration of accidents. QUANTITY. Real distinction of material substance and external extension. Essence of quantity. Extrinsic denominations based on quantity. QUALITY. Nature of quality. Classes or species of quality. Extrinsic accidents based on quality—action and passion. Single motion in agent and patient. RELATION. Predicamental and transcendental relation. Foundation in reality for predicamental relation. Reality of predicamental relation. Denial of reality of relations. Relation and the Trinity. Divine Persons as subsistent relations. Accidents as immediate source of lesser changes.

X. CAUSES OF BEING GENERALLY: EFFICIENT CAUSALITY 241

Notion of principle. Notion of extrinsic principle. Need for extrinsic principles in an existential metaphysics. Extrinsic principles and existence. Extrinsic principles and cause. Cause and principle. Cause and condition. Cause as a transcendental aspect of being. Contrast between Aristotle and St. Thomas on notion of cause. Kinds of causal influences in finite causality. Efficient cause in St. Thomas. Material cause. Formal cause. Relations of material and formal causes. Final cause. Influence of the final cause. Final cause in intentional order. Reciprocity of efficient and final causes. Action of efficiency. Factors in finite efficiency. Scotistic view of efficiency. Efficiency in metaphysics of Suarez. Perfection of efficiency in finite agents. Finite and Infinite efficiency contrasted. Source of action of finite efficient causes. Change or motion in finite efficient causes. No transfer of accidents in efficient causality. Conditions of efficiency. Metaphysical impossibility of "action at a distance." Action and reaction. Implication of community in efficiency. The principle of efficient causality. Most ultimate formulation of the principle of efficient causality. Less ultimate formulations. Unsatisfactory formulations. Principle of efficient causality not a transcendental principle. Corollaries of the principle of efficient causality.

XI. INFERENCE FROM FINITE EFFICIENCY TO FIRST EFFICIENT CAUSE: GOD'S EXISTENCE AND NATURE 271

Résumé on finite efficiency. Limit of the inference. God and the immovable mover in the philosophy of St. Thomas. First argument from change in St. Thomas. Identification of immovable mover with the God of St. Thomas. Change implies participated being. Reason for elliptical character of argument. Second argument from efficient causes of motion or change. Second argument similar to first. Third argument from substantial change. Background of the third argument. Change as the basis of the third argument. Explicit transfer of the third argument to the metaphysical level. Nature of Infinite Efficiency. Reality of finite efficiency. Finite efficiency and Infinite Intelligence. Respective roles of Infinite and finite efficiency. Instrumental character of finite efficiency—operatio ad esse. Proper causality of finite agents—determinans illud esse. Co-action of Infinite and finite efficiency. Mystery of co-action. Instrumental causality in finite efficiency. Nature of finite instrumental efficiency. Other divisions of efficiency. Modern error on efficient causality. Mill's view of efficient causality. Subjective explanations of causal necessity. Inadequacy of subjective explanations.

XII. FINAL CAUSALITY: INFERENCE TO ULTIMATE FINAL CAUSE 297

Résumé. Need of additional extrinsic principle of final causality. Final cause exercises its influence through efficient cause. The causality of the final cause. Knowledge and final causality. Final causality in relation to rational agent. Finality and efficiency in the will of the rational agent. Distinct causality of final cause. Commentators on the Thomistic view. An apparent difficulty on reality of final causality. Requirements of final causality. Not actualization of a potency. Finality and irrational agents. Instinct and intelligence. Hierarchy of appetency. Necessity of finality in the lower orders. Principle of finality, tentative form. Finality as a transcendental principle. Analogous predication of principle of finality. Necessity of principle of finality. Objections to the necessity of the principle. Inference to Ultimate Final Cause. Analysis of the argument from final cause. Argument includes all finite agents. Probative force of the argument. Transfer of the fifth argument to the metaphysical level. Value of the fifth argument. Fifth argument and the notion of law. Divine Providence and Eternal Law. All law derived from Eternal Law. Participation of rational agents in Eternal Law. Participation of irrational agents in Eternal Law. Positive law of Church and State. Divine Omniscience. Divine Omnipotence. Finality and chance. Example of chance. Divine Action and chance. Chance as stressing God's existence. Kinds of final causes. Exemplar cause. Divine Exemplarism.

XIII. TRANSCENDENTAL PROPERTIES OF BEING: ONENESS 325

NOTION OF TRANSCENDENTAL PROPERTIES. Possibility of properties of being as being. Transcendental aspects of being in the judgment of existence—oneness. Truth aspect. Goodness aspect. The transcendentals in relation to predicaments. Logical plan of the transcendentals. Character of the logical plan. Beauty and the transcendentals. Summary on transcendental properties. THE TRANSCENDENTAL ONE OF BEING. Infinite Unity. Transcendental oneness distinct from predicamental one. Divisions (degrees) of the transcendental one. One of individuality and individuation. Multitude and number. The one of society. Thomistic view of society. Unity of society in intentional order. Transcendental one in theology of Incarnation. Transcendental unity and the Trinity. Relation of being and one as principle of identity. Thing (res) and identity. Importance of the one of being.

XIV. THE RELATIVE TRANSCENDENTALS: TRUTH AND GOODNESS 343

TRUTH IN THE TRANSCENDENTALS OF BEING. Truth of being and logical truth. Truth of being and existence. Inference to unparticipated truth. Participated truth. Truth of being as an intrinsic denomina-

tion of being. Importance of truth of being. Falsity and existing being. Ultimate foundation of falsity. Falsity and evil. GOODNESS IN THE INTUITION OF BEING. Description of goodness. Good follows one and true of being. Goodness and perfection. The good as the appetible. Argument for Infinite Goodness. Axioms of goodness. Efficiency proportioned to goodness. Communication and the Trinity. Kinds of goodness. The good as useful. Delight and the goodness. Rest of delightful good not static. Concurrence of goods in Summum Bonum. Metaphysical and moral good. Goodness and the foundation of objective philosophy of values.

XV. THE PROBLEM OF EVIL 364

Evil of being. Evil founded on good. Evil a privation. Subject of evil. Evil as abstract and concrete. Modes of opposition of evil to a particular good. Powers and diminution. Degrees of evil. Evil distant from being and non-being. Kinds of evil. St. Thomas' later classification. Evil of punishment. Contrast of punishment and fault. Causes of evil. Material cause—no formal cause. Extrinsic causes of evil—final cause. Efficient cause and evil. Accidental cause of evil reduced to the good direct cause. Special problem of cause and moral evil (malum culpae). Specification in natural and moral order. Positive aspect of moral evil. Efficient cause of moral evil. Deficiency in moral evil. Evil as a cause. Evil and Divine Government. Lower order achieves end in end of higher order. God's freedom in creation. Divine Government and moral evil of fault and punishment. Finite and Infinite freedom. Free agent reflects God more perfectly. Thomistic optimism. No absolute optimism in Thomism. Evil and Divine Revelation.

XVI. THE INTEGRATION OF THE TRANSCENDENTALS IN BEAUTY: ARTISTIC PRODUCTION 386

Beauty not included in the logical plan of transcendentals. Beauty is a transcendental. Beauty as a transcendental in St. Thomas. Beauty related to the whole person. Beauty as goodness of truth of individuality. Beauty arouses affective knowledge. Unique pleasure of experience of the beautiful. Beauty and connatural knowledge. Influence of will. Objective requirements. Importance of proportion. Integrity and clarity. Analogy of beauty. Beauty as name of God. Beauty in nature and in art. Physical and spiritual beauty. Man's virtue of art—creative intuition. Communication of aesthetic experience. The artist's problem. Further problems of communication in the arts. Art and morality. Responsibility of the artist. Evil in art. The Christian artist. Naturalism in art is unacceptable. Ugliness—objective basis. Subjective aspects of ugliness. Falsity and ugliness. Beauty as the ultimate revelation of a being's unique act of existence. The aesthetic and the mystical experience. Summary. Confirming voice of mankind.

INDEX 405
