Contents

Preface — v

List of Contributing Authors — xi

1 General Part — 1

1.1 Introduction and History of the Preanalytical Phase
   Guder WG — 3

1.2 Requesting Laboratory Tests: Benefits and Limitations of Laboratory Diagnostic Pathways

1.3 Definition of the Influence and Interference Factors in the Preanalytical Phase
   Guder WG — 22

1.4 Extranalytical Procedures and their Management in Total Turnaround Time
   Guder WG, Wisser H — 27

2 Types of Samples and Anatomic Site of Origin — 35

2.1 Arterial, Venous or Capillary Blood?
   Guder WG, Hagemann P — 37

2.2 Special Pre-Examination Conditions in Newborns and Pediatric Patients
   Vassault A, Couderc R — 40

2.3 Venous Blood Sampling (Phlebotomy)
   Guder WG, Comes MP — 50

2.4 Arterial Sampling of Blood
   Guder WG, Hagemann P — 54

2.5 Capillary Sampling of Blood
   Comes MP, Guder WG — 59

2.6 Plasma or Serum? Which Anticoagulant to Use?
   Guder WG, Narayanan S — 64

2.7 Spot or Timed Urine — Preanalytical Aspects of Urinalysis
   Guder WG, Delange J — 69

2.8 When are other Body Fluids to be Analyzed?
   Guder WG — 81

2.9 Who is Doing Phlebotomy in Europe?
   Simundic A-M — 90
3 Biological Variables Influencing Laboratory Results — 95
3.1 Age and Gender Differences - Unavoidable Influences on Laboratory Results
   *Guder WG, Narayanan S* — 97
3.2 Variables during Sampling
   *Guder WG, Narayanan S* — 102
3.3 Food, Drinks and Smoking
   *Narayanan S, Guder WG* — 115
3.4 Effect of Herbs
   *Narayanan S, Young DS* — 123

4 Source and Nature of Interferences of Analytical Procedures — 133
4.1 The Hemolytic Sample
   *Guder WG, da Fonseca-Wollheim F, Schmitt YM, Töpfer G* — 135
4.2 The Lipemic Sample
   *Guder WG, Nikolac N, Schmitt YM, Töpfer G* — 141
4.3 The Icteric Sample
   *Guder WG, da Fonseca-Wollheim F, Schmitt YM, Töpfer G* — 147
4.4 Drug Interferences
   *Sonntag O, Tryding N* — 152
4.5 Interferences from Blood Sampling Device Materials on Clinical Assays:
   I Blood Collection Devices and Their Constituents and Additives
   *Bowen RAR, Adcock-Funk DM* — 170
4.6 Influences and Interferences from Blood Sampling Device Materials on
   Clinical Assays: II Special Devices and Procedures; Recommendations
   *Bowen RAR, Adcock-Funk DM* — 205

5 Sampling Materials and Techniques — 217
5.1 Materials and Techniques of Sampling Blood and other Body Fluids.
   Contributions of Greiner – Bio One
   *Ivanov H, Präuer J, Schimpi M, Castelo-Rose G, Wiesner C,
   Ehrenfellner T* — 219
5.2 Materials and Techniques of Sampling Blood by Sarstedt
   *Seipel C* — 231
5.3 BD Preanalytical Systems – Diagnostic Sample Collection
   *Schlüter K, Church S* — 238

6 Specimen Processing in the Preanalytical Phase — 249
6.1 Sample Transport, Treatment after Arrival, Storage and Disposal
   *Guder WG, Narayanan S* — 251
6.2 Preanalytical Workflow Techniques and Procedures
   *Streichert T, von Meyer A* — 264
7 Preanalytical Variables and Rules in Specific Fields of Medical Laboratory Diagnostics — 271

7.1 Hemostaseology
  Dempfle C-E, Töpfer G — 273

7.2 Hematology including Flow Cytometry of Blood Cells
  Banfi G, Guder WG, Narayanan S — 282

7.3 Blood Gases, Ions and Electrolytes
  Simundic A-M — 292

7.4 Clinical Chemistry including Metabolites, Enzymes, Hormones and Proteins
  Narayanan S, Guder WG — 298

7.5 Preanalytical Variables in Therapeutic Drug Monitoring
  Narayanan S, Agrawal Y — 305

7.6 Preanalytical Variables in Microbiology
  Narayanan S, Schuetz AN — 318

7.7 Biobanking
  Leichtle A, Findeisen P — 328

8 Quality Assurance and Auditing of the Preanalytical Phase — 335

8.1 Auditing of the Preanalytical Phase
  Petersmann A., Schlüter K, Nauck M. — 337

8.2 Internal Quality Assurance for Preanalytical Phase
  Cadamuro J — 345

8.3 External Quality Assurance for the Preanalytical Phase
  Kristensen GBB, Aakre KM, Kristoffersen AH, Sandberg S — 352

9 Annex: Samples and Stability of Analytes — 365

Index — 399
