

Contents

From Dust Astrophysics Towards Dust Mineralogy – A Historical Review	1
J. Dorschner	
1 Astrophysics and Cosmic Mineralogy	2
2 Interstellar Dust on the Way to Astrophysical Topicality	5
3 Heuristic Dust Modelling with Refractory Grains	13
4 Dust Mineralogy via Spectral Analysis	23
5 The Laboratory Base of Cosmic Dust Mineralogy	36
6 Mineral Identification by Spectroscopy	46
References	51
Formation and Evolution of Minerals in Accretion Disks and Stellar Outflows	61
H.-P. Gail	
1 Introduction	61
2 Dust-Forming Objects and Their Element Abundances	62
3 Equilibrium Condensation	66
4 Dust Growth Processes	82
5 Dust Processing	91
6 Circumstellar Dust Shells	101
7 Dust in Protoplanetary Accretion Discs	111
8 Concluding Remarks	136
References	137
The Mineralogy of Interstellar and Circumstellar Dust in Galaxies	143
F.J. Molster, L.B.F.M. Waters, and F. Kemper	
1 Introduction	144
2 Observations and Identification	145
3 Observational Astromineralogical Results	149
4 Life-Cycle of Dust	169
5 Dust in Extragalactic Environments	186
6 Conclusions and Future Directions	193
References	194

The Mineralogy of Cometary Dust	203
M.S. Hanner and M.E. Zolensky	
1 Introduction	204
2 Mineralogy from Infrared Spectroscopy	205
3 In Situ Sampling	210
4 Interplanetary Dust Particles of Probable Cometary Origin	211
5 Mineralogy of the Wild 2 Sample	212
6 Origins of Cometary Silicates	221
7 Discussion and Conclusions	224
References	226
The In-Situ Study of Solid Particles in the Solar System	233
I. Mann and E.K. Jessberger	
1 Introduction	233
2 The Basis of Dust Measurements	236
3 In-Situ Measurements of Interplanetary Dust	240
4 In-Situ Studies at Comets	243
5 In-Situ Detection of Interstellar Dust	247
6 Discussion	252
7 Summary	253
References	253
The Astromineralogy of Interplanetary Dust Particles	259
J. Bradley	
1 Introduction	260
2 Specimen Preparation and Analytical Methods	261
3 Astrominerals in IDPs	265
4 Astromaterials in Comet 81P/Wild 2	272
5 Conclusions	273
References	273
The Most Primitive Material in Meteorites	277
U. Ott	
1 The Most Primitive Material in Meteorites	278
2 Overview: Identification and Isolation	279
3 Isotopic Structures and Stellar Sources	285
4 Nucleosynthesis Inferred	295
5 Mineralogy and Morphology	298
6 Detection in Space	301
7 Age and History	303
8 Summary	306
References	307

Laboratory Astrophysics of Cosmic Dust Analogues	313
T. Henning	
1 Introduction	313
2 What Are Cosmic Dust Analogue Materials?	314
3 Material Production and Characterization	315
4 Measurement of Optical Properties	318
5 Interpretation of Astronomical Data	321
6 Conclusions	326
References	327
