

Key to Anatomic Structures pp. 26–73, 152–153 (head and neck)	Front Cover Flap	Normal Anatomy of the Temporal Bone (Coronal/Axial)	46
		Normal Variants of the Cranium	50
Some Practical Hints for Using this Manual	Front Cover Flap	Typical Partial Volume Effects of the Cranium	52
Schemata for CT drawings	1	Cranial Pathology	
Foreword and List of Abbreviations	5	Intracranial Hemorrhage	54
Physical and Technical Fundamentals		Cerebral Infarcts	58
General Principles of CT	6	Cerebral Tumors and Metastases	59
Comparison of Conventional CT with Spiral CT	7	Inflammatory Processes	60
Spatial Resolution, Pitch	8	Orbit	61
Section Collimation: Resolution along the Z-axis	9	Facial Skeleton and Sinuses	62
Adaptive Detector Design	10	Cervical CT	
Reconstruction Algorithms	11	Selection of the Image Plane	64
Effects of kV, mAs and Scan Time	12	for Reading Cervical CT Images	
Three-Dimensional Reconstruction Methods:	13	Normal Anatomy of the Neck	65
Maximum Intensity Projection (MIP)		Cervical Pathology	
Multiplanar Reconstruction (MPR)		Inflammatory Processes and Tumors	70
Surface Rendering		Thyroid Gland	71
Basic Rules for Reading CT Examinations		Key to Anatomic Structures	Back Cover Flap
Anatomic Orientation	14	pp. 71, 74–149 (thorax and abdomen)	
Partial Volume Effects		Chest CT	
Distinguishing Nodular from Tubular Structures	15	Selection of the Image Plane	74
Densitometry		Systemic Sequential Approach to Interpretation	
Density Levels of Different Tissues	16	Thorax Readings	
Documentation Using Different Window Settings	17	Normal Anatomy of the Chest	75
Preparing the Patient Ingrid Boehm		Chest CT Pathology	
Medical History,	18	High-Resolution CT – Normal Anatomy	84
Renal Toxicity, Medication as Risk		HRCT of the Lungs: Technique, Effects, Indications	86
Adverse CM-Reactions and their Prophylaxis		Anatomic Variants of the Chest	88
Oral Administration of Contrast Agents	19	Chest Wall	
Informing the Patient, Controlling Respiration,		Abnormal Lymph Nodes	89
Removal of All Metallic Objects		Breast, Bony Thorax	90
Administration of Contrast Agents Ingrid Boehm		Mediastinum	
Contrast-Enhanced CT-Scans and Contrast Media	20	Tumor Masses	91
Per oral CM-Application, The Procedure,		Enlarged Lymph Nodes	92
Additional Medication for an Optimal Imaging Result		Vascular Pathology	93
Intravenous CM-Application	21	Heart	94
Preparing the IV-Line,		Lung	
Inflow Phenomena		Intrapulmonary Nodules	95
Hyperthyroidism (Type A Reactions)	23	Bronchial Carcinoma, Malignant Lymphangiomatosis	96
Hypersensitivity Reactions (Type B Reactions)	24	Sarcoidosis, Tuberculosis, Aspergillosis	97
Premedication		Pleural Changes, Asbestosis	98
Treatment of Adverse CM Reactions to CM	25	Silicosis, Pulmonary Emphysema	99
Cranial CT		Interstitial Pulmonary Fibrosis	100
Selection of Image Plane	26	Abdominal CT	
Systemic Approach to Interpretation		Selection of the Image Plane	102
for Reading Cranial CT	26	Systemic Sequential Approach to Interpretation	
Cranial CT: Normal Findings		Abdominal Readings	
Normal Cranial Anatomy	27	Normal Anatomy of the Abdomen	103
Normal Anatomy of the Orbit (Axial)	33	Normal Anatomy of the Pelvis (Male)	113
Normal Anatomy of the Facial Skeleton (Coronal)	41	Normal Anatomy of the Pelvis (Female)	115

Table of Contents

Abdominal Pathology		Lumbar Fractures	156
Anatomic Variants of the Abdomen,	117	Lumbar Spine: Tumors and Metastases	157
Typical Partial Volume Effects		Lumbar Spine: Infection and Methods of Stabilization	158
Abdominal Wall			
Enlarged Lymph Nodes, Abscesses	118	Lower Extremity	
Subcutaneous Heparin Injections		Normal Anatomy of the Thigh	159
Abdominal Wall Metastases, Inguinal Hernias	119	Normal Anatomy of the Knee	160
Liver		Normal Anatomy of the Lower Leg	161
Segmental Anatomy of the Liver	120	Normal Anatomy of the Foot	162
Examination Techniques:	121	Fractures of the Foot	164
Window Selection, Contrast Bolus, CT Portography		Pelvis and Upper Leg: Inflammatory Processes	166
Cystic Hepatic Lesions	122	Knee – Fractures, Skeletal System:	
Hepatic Metastases	123	Fracture Diagnosis	
Solid Liver Tumors:	124		
Hemangioma, Adenoma, Focal Nodular Hyperplasia		CT-Guided Interventions	168
Diffuse Liver Changes:	125		
Fatty Liver, Hemochromatosis, Hepatic Cirrhosis		ABC-Primer of CT Evaluation	170
Biliary Tract			
Pneumobilia, Cholestasis	125	Radiation Safety	
Gallbladder		Radiation Dose and Cancer Risk	174
Cholecystolithiasis,	126	Automatic Bolus Tracking (BT)	176
Chronic Inflammatory Processes		Tube Current Modulation – Dose Reduction	177
Spleen			
Contrast Enhancement, Splenomegaly	127	CT Angiography	
Focal Splenic Changes	128	Intracranial Arteries	178
Pancreas		Venous Sinus Thrombosis	179
Acute and Chronic Pancreatitis, Pancreatic Tumors	129	Carotid Arteries	180
Adrenal Glands		Aorta	182
Hyperplasia, Adenomas, Metastases, Carcinoma	130	Heart: Coronary Arteries, Coronary Calcium Screening	184
Kidneys		Pulmonary Vessels (Pulmonary Embolism)	186
Congenital Variants	132	Abdominal Vessels	187
Cystic Lesions, Hydronephrosis	133	Iliofemoral Vessels	188
Solid Tumors	134	Vascular Prostheses, Outlook	189
Vascular Renal Changes	135		
Urinary Bladder			
Catheters, Diverticula, Solid Tumors	136	Contrast Injectors	191
Reproductive Organs			
Uterus	137	Dual Source CT	198
Ovaries, Prostate, Vas Deferens	138		
Gastrointestinal Tract		Introduction to PET/CT	202
Stomach, Inflammatory Bowel Diseases	139	Tumors of the Gastrointestinal Tract	204
Colon	140	Pulmonary Tumors	205
Bowel Obstruction and Ileus	141	Tumors of the Prostate Gland	207
		Neuroendocrine Tumors	208
Retroperitoneum			
Aneurysms	142	Anatomy in Coronal MPRs	210
Venous Thrombosis	143		
Enlarged Lymph Nodes	144	Anatomy in Sagittal MPRs	214
Skeletal Changes			
Bony Pelvis: Normal Findings, Metastases	145		
Fractures	147		
Femoral Head Necrosis and Hip Dysplasia	148	Index	228
		References	232
Spinal Column: Skeletal Pathology			and back cover flap
Cervical Spine: Normal Anatomy	152		
Cervical Disk Herniation and Fractures	153	to Spinal and Lower	Back cover flap
Thoracic Spine: Normal Findings and Fractures	154	Extremity Diagrams (pp. 152–167)	
Lumbar Spine:	155		
Normal Findings and Lumbar Disk Herniation		to Thoracic and Pelvic Diagrams	Back cover flap
		(pp. 74–149)
