

# Contents

<b>1 Basic Material .....</b>	<b>1</b>
1.1 Bases and Trigonometric Functions.....	1
1.2 Strict and Uniform Convexity .....	3
1.3 Representations of Compact Linear Operators .....	20
<b>2 Trigonometric Generalisations .....</b>	<b>33</b>
2.1 The Functions $\sin_p$ and $\cos_p$ .....	33
2.2 Basis Properties .....	43
<b>3 The Laplacian and Some Natural Variants .....</b>	<b>49</b>
3.1 The Laplacian .....	49
3.2 The $p$ -Laplacian .....	50
3.3 Eigenfunctions of the $p$ -Laplacian, $n = 1$ .....	55
3.4 Eigenfunctions of the $p$ -Laplacian, $n > 1$ .....	61
<b>4 Hardy Operators .....</b>	<b>65</b>
4.1 Conditions for Boundedness and Compactness .....	65
4.2 The Norm of the Hardy Operator .....	67
<b>5 <math>s</math>-Numbers and Generalised Trigonometric Functions .....</b>	<b>73</b>
5.1 $s$ -Numbers and $n$ -Widths .....	73
5.2 The $s$ -Numbers of Hardy Operators .....	83
5.3 $s$ -Numbers of the Sobolev Embedding on Intervals .....	95
<b>6 Estimates of <math>s</math>-Numbers of Weighted Hardy Operators .....</b>	<b>105</b>
6.1 Introduction and Basic Notation.....	105
6.2 Properties of $\mathcal{A}$ .....	107
6.3 Equivalence of Strict $s$ -Numbers for $T$ .....	112
6.4 The First Asymptotic Term when $1 < p < \infty$ .....	115
6.5 The Cases $p = \infty$ and $p = 1$ .....	118

<b>7 More Refined Estimates .....</b>	129
7.1 Remainder Estimates.....	129
7.2 The Second Asymptotic Term .....	138
7.3 $l_q$ and Weak- $l_q$ Estimates when $1 < p < \infty$ .....	141
7.4 $l_q$ and Weak- $l_q$ Estimates, Cases $p = 1$ and $\infty$ .....	149
<b>8 A Non-Linear Integral System .....</b>	153
8.1 Upper and Lower Estimates for a Non-Linear Integral System.....	153
8.2 The Case $q \leq p$ .....	165
8.3 The Case $p \leq q$ .....	175
8.4 The Case $p = q$ .....	182
<b>9 Hardy Operators on Variable Exponent Spaces.....</b>	183
9.1 Spaces with Variable Exponent.....	183
9.2 Hardy Operators.....	192
9.2.1 The Case when $p$ is a Step-Function .....	196
9.2.2 The Case when $p$ is Strongly Log-Hölder-Continuous .....	198
9.3 A Version of the $p$ -Laplacian .....	207
<b>References.....</b>	211
<b>Index.....</b>	217
