Chiral Environmental Pollutants

Trace Analysis and Ecotoxicology

Springer

Contents

1	Introduction	1
1.1	Links Between Chirality and Life Processes	1
1.2	General Principles of Chirality	4
1.2.1	Chiral Environmental Pollutants with a Stereogenic Centre	5
1.2.2	Environmental Pollutants with Axial Chirality	5
1.2.3	Asymmetry of Cyclic Environmental Pollutants	8
1.2.4	Chiral Environmental Pollutants with Two or More Stereogenic Centres	10
	References	13
2	Enantioselective Chromatographic Methods for the Analysis of Chiral Environmental Pollutants	15
2.1	General Considerations	15
2.2	Enantioselective High Performance Liquid Chromatography (HPLC)	18
2.2.1	Indirect Methods	18
2.2.2	Direct Methods	19
2.2.3	The Evolution of Chiral Stationary Phases for Liquid Chromatography	20
2.2.4	Other Experimental Approaches for Enantioselective Liquid Chromatography	25
2.2.5	Liquid Chromatography as a Measurement Tool for Chiral Interactions	27
2.2.6	Recent Reviews on Enantioselective HPLC	29
2.3	Enantioselective High Resolution Gas Chromatography (HRGC)	29
2.3.1	The Evolution of Chiral Stationary Phases for Capillary Gas Chromatography	29
2.3.2	Enantioselective Multidimensional Capillary Gas Chromatography (MDcGC)	33
2.3.3	Other Experimental Approaches for Enantioselective Capillary Gas Chromatography	33
2.3.4	Possible Sources of Error of Enantioselective cGC	35
2.3.5	Recent Reviews on Enantioselective HRGC	35
2.4	Capillary Electrophoresis (CE)	36
2.4.1	General Considerations	36
2.4.2	Enantioselective CE	37

X	Contents	
2.4.3	Other Experimental Approaches for Enantioselective CE	38
2.4.4	Recent Reviews on Enantioselective CE	39
2.5	Supercritical Fluid Chromatography (SFC)	39
2.5.1	General Considerations	39
2.5.2	Enantioselective SFC	40
2.5.3	Recent Reviews on Enantioselective SFC	40
2.6	Other Methods for the Elucidation of Molecular Structures and Mechanistic Details of Chiral Pollutants	40
2.6.1	X-ray Crystallography	41
2.6.2	Nuclear Magnetic Resonance Studies	42
	References	43
3	Chiral Xenobiotics in the Environment	53
3.1	Microbiological Transformation of Chiral Environmental Xenobiotics	53
3.1.1	Laboratory Experiments	53
3.1.2	<i>In Situ</i> Investigations in Marine and Limnic Waters	62
3.2	Transformation/Accumulation of Chiral Xenobiotics in Biota	73
3.2.1	Enzymatic Transformation Processes	73
3.2.1.1	Marine and Limnic Ecosystem	73
3.2.1.2	Terrestrial Ecosystem	103
3.2.2	Enantioselective Permeation Through the Blood-Brain Barrier ...	116
3.3	Transformation/Accumulation of Xenobiotics in Water, Sediment and Biota of Wastewater Treatment Plants	121
3.3.1	Separation of the Standard Substances of Polycyclic Musks	122
3.3.2	Sampling Locations and Samples	125
3.3.3	Enantiomeric Ratios of ATII in Water and SPMD Samples	126
3.3.4	Enantiomeric Ratios of HHCB, ATII, AHTN, and AHDl in Biota Samples	127
3.3.5	Comparison of Tench and Crucian Carp Samples	129
3.3.6	Implications of the Observed Enantioselectivity for Risk Assessment Studies	130
3.3.7	A New Challenge: HHCB Metabolites	131
3.3.8	Other Enantioselective Studies Including Sewage Water or Sludge	132
3.4	Photochemical Conversion Processes	135
3.5	Transformation/Accumulation of Chiral Xenobiotics in Sediments and Soils	137
3.5.1	Chiral Xenobiotics in Sediments	137
3.5.2	Chiral Xenobiotics in Soils and Ambient Air	140
3.6	Air/Water Gas Exchange and Atmospheric Long-Range Transport	147
3.6.1	Air/Water Gas Exchange Studies in Lakes	147
3.6.2	Air/Sea Gas Exchange Studies	149
	References	153

4	Enantioselective Toxic and Ecotoxic Effects of Drugs and Environmental Pollutants	163
4.1	Differential Toxic Effects of Drug Enantiomers and the Role of Enantioselective Chromatography	163
4.2	Differential Toxic Effects of Chiral Environmental Pollutants and the Role of Enantioselective Chromatography	165
4.3	Acute and Chronic Toxicity of Chiral Environmental Pollutants ...	168
4.4	Enantioselective Toxic Effects of Other Industrial Chiral Chemicals	169
4.5	Ecotoxic Effects of Biogenic Chiral Compounds: a Challenge for Enantioselective Chromatography	172
4.6	Differential Mortality of Test Animals Induced by Chiral Environmental Pollutants	176
	References	186
5	Perspectives of Enantioselective Analyses	189
5.1	Concern About Chiral Environmental Pollutants and the Legal Implications	189
5.1.1	Regulations on Chiral Drugs in the USA	189
5.1.2	Regulations on Chiral Drugs in the European Community	191
5.1.3	Regulations on Chiral Drugs in Japan and Other Countries	191
5.2	The Role of Enantioselective Analyses for Model and Mechanistic Studies of Enantioselective Phenomena	192
5.2.1	Models for the Prebiotic Formation of Homochirality	193
5.2.2	Innovative New Enantioselective Detectors	196
	References	197
