## Contents

Abstract ................................................................. 1

Outlook of Agricultural Development to 2050 and the Demand for Science and Technology ........................................................................ 7

1.1 Outlook for Global Agriculture Development to 2050 .................. 7

1.2 Outlook of Agricultural Development in China to 2050 ............... 14

1.3 Outlook for Demand of Major Agricultural Technology in China to 2050 ... 25

Main References .................................................................. 28

Roadmap and Goals of Agricultural Science and Technology in China ..................................................................................... 29

2.1 The General Goal ................................................................ 29

2.2 Target Phases ..................................................................... 30

2.3 General Roadmap .............................................................. 39

Roadmap of Plant Germplasm Resources and Modern Plant Breeding Science and Technology Development ......................... 42

3.1 Requirements and Trends for Future Development .................... 42

3.2 Scientific and Technological Goals ........................................ 49

3.3 Roadmap for Scientific Development ..................................... 53

Main References .................................................................. 64
The Institutions and Policy Support for Agricultural Science and Technology Development in the Future .......................... 143

8.1 Deepen the Reform of Agricultural Science and Technology, Establishing a National Innovation System for Agricultural Science and Technology .......... 143

8.2 Establish National Agricultural Long-term Technology Investment Mechanism and Improve the Investment Structure of Agricultural Science and Technology .................................................................................. 147

8.3 Train a Large Number of Talents and Innovative Teams, and Enhance the Ability of Independent Innovation of Agricultural Science and Technology ........................................................................................................ 148

Main References.................................................................................................................. 149

Epilogue ............................................................................................................................. 150
